

# Oregon Science Standards Correlation to PhD Science<sup>TM</sup>

Green indicates that <i>PhD Science</i> ™ fully addresses the standard within the grade level.
Blue indicates that <i>PhD Science</i> covers the standard but in a different grade level.
Yellow indicates that <i>PhD Science</i> partially covers the standard within the grade level.
Red indicates that <i>PhD Science</i> does not cover the standard.

Key: Module (M), Lesson (L)

## PhD Science Level 3

The Grade 3 Oregon Science Standards are fully covered by the Level 3 *PhD Science* curriculum. A detailed analysis of alignment appears in the table below.

Grade 3 Performance Expectations		Aligned PhD
		Science Lessons
3-PS2 Motio	on and Stability: Forces and Interactions	
3-PS2-1	Plan and conduct an investigation to provide evidence of the effects	Level 3 M4 L10-L18
	of balanced and unbalanced forces on the motion of an object.	Level 3 M4 L28-L30
3-PS2-2	Make observations and/or measurements of an object's motion to	Level 3 M4 L1-L9
	provide evidence that a pattern can be used to predict future motion.	Level 3 M4 L28-L30
3-PS2-3	Ask questions to determine cause and effect relationships of electric	Level 3 M4 L19-L21
	or magnetic interactions between two objects not in contact with	Level 3 M4 L28-L30
	each other.	
3-PS2-4	Define a simple design problem that can be solved by applying	Level 3 M4 L22-L30
	scientific ideas about magnets.	
3-LS1 From	Molecules to Organisms: Structures and Processes	
3-LS1-1	Develop models to describe that organisms have unique and diverse	Level 3 M3 L7-L8
	life cycles but all have in common birth, growth, reproduction, and	Level 3 M3 L23-L28
	death.	
3-LS2 Ecosy	stems: Interactions, Energy, and Dynamics	
3-LS2-1	Construct an argument that some animals form groups that help	Level 3 M2 L13-L15
	members survive.	Level 3 M2 L26-L28
3-LS3 Hered	lity: Inheritance and Variation of Traits	
3-LS3-1	Analyze and interpret data to provide evidence that plants and	Level 3 M3 L1–L6
	animals have traits inherited from parents and that variation of these	Level 3 M3 L14-L18
	traits exists in a group of similar organisms.	Level 3 M3 L26-L28
3-LS3-2	Use evidence to support the explanation that traits can be influenced	Level 3 M3 L9-L13
	by the environment.	Level 3 M3 L19–L20
		Level 3 M3 L26-L28
3-LS4 Biolog	gical Evolution: Unity and Diversity	
3-LS4-1	Analyze and interpret data from fossils to provide evidence of the	Level 3 M2 L1–L8
	organisms and the environments in which they lived long ago.	Level 3 M2 L26-L28

3-LS4-2	Use evidence to construct an explanation for how the variations in	Level 3 M3 L21–L28
	characteristics among individuals of the same species may provide	
	advantages in surviving, finding mates, and reproducing.	
3-LS4-3	Construct an argument with evidence that in a particular habitat	Level 3 M2 L1–L2
	some organisms can survive well, some survive less well, and some	Level 3 M2 L9-L12
	cannot survive at all.	Level 3 M2 L16-L19
		Level 3 M2 L22-L28
3-LS4-4	Make a claim about the merit of a solution to a problem caused when	Level 3 M2 L16-L28
	the environment changes and the types of plants and animals that	
	live there may change.	
3-ESS2 Earth	's Systems	
3-ESS2-1	Represent data in tables and graphical displays to describe typical	Level 3 M1 L1–L15
	weather conditions expected during a particular season.	Level 3 M1 L19-L20
		Level 3 M1 L27–L29
3-ESS2-2	Obtain and combine information to describe climates in different	Level 3 M1 L11–L15
	regions of the world.	Level 3 M1 L27–L29
3-ESS3 Earth	and Human Activity	
3-ESS3-1	Make a claim about the merit of a design solution that reduces the	Level 3 M1 L1-L3
	impacts of a weather-related hazard.	Level 3 M1 L16-L29
3-5-ETS1 Eng	gineering Design	
3-5-ETS1-1	Define a simple design problem reflecting a need or a want that	Level 3 M1 L21–L26
	includes specified criteria for success and constraints on materials,	Level 3 M4 L23-L27
	time, or cost.	
3-5-ETS1-2	Generate and compare multiple possible solutions to a problem	Level 4 M1 L12–L17
	based on how well each is likely to meet the criteria and constraints	Level 5 M3 L19–L23
	of the problem.	
3-5-ETS1-3	Plan and carry out fair tests in which variables are controlled and	Level 3 M2 L23-L27
	failure points are considered to identify aspects of a model or	Level 3 M4 L23-L27
	prototype that can be improved.	

Sci	Science and Engineering Practices		Aligned PhD Science Lessons
1	<ul> <li>Asking Questions and Defining Problems</li> <li>Ask questions that can be investigated based on patterns such as cause and effect relationships.</li> <li>Define a simple problem that can be solved through the development of a new or improved object or tool.</li> <li>Define a simple design problem that can be solved through the development of an object, tool, process, or system and includes several criteria for success</li> </ul>		Level 3 M1 L1–L3 Level 3 M1 L21–L26 Level 3 M2 L1–L2 Level 3 M3 L1–L3 Level 3 M3 L12–L13 Level 3 M4 L1–L3 Level 3 M4 L7–L9
	and constraints on materials, time, or cost.		Level 3 M4 L15–L16 Level 3 M4 L19–L30

2	Developing and Using Models	Level 3 M1 L1–L3
-	Develop models to describe phenomena.	Level 3 M1 L19–L20
	<ul> <li>Develop a model using an analogy, example, or abstract representation to</li> </ul>	Level 3 M2 L1–L3
	describe a scientific principle or design solution.	Level 3 M2 L6–L12
	describe a scientific principle of design solution.	Level 3 M2 L22–L25
		Level 3 M3 L7–L11
		Level 3 M3 L21–L25
		Level 3 M4 L1–L3
		Level 3 M4 L17-L18
		Level 3 M4 L23-L27
3	Planning and Carrying Out Investigations	Level 3 M2 L4–L5
	<ul> <li>Plan and conduct an investigation collaboratively to produce data to serve as</li> </ul>	Level 3 M3 L12-L13
	the basis for evidence, using fair tests in which variables are controlled and	Level 3 M4 L7-L18
	the number of trials considered.	Level 3 M4 L23-L30
	Make observations and/or measurements to produce data to serve as the	
	basis for evidence for an explanation of a phenomenon or test a design	
	solution.	
4	Analyzing and Interpreting Data	Level 3 M1 L4–L15
	Analyze and interpret data to make sense of phenomena using logical	Level 3 M1 L19-L20
	reasoning.	Level 3 M1 L27-L29
	Represent data in tables and various graphical displays (bar graphs,	Level 3 M2 L3-L8
	pictographs, and/or pie charts) to reveal patterns that indicate relationships.	Level 3 M2 L16-L19
		Level 3 M3 L4-L8
		Level 3 M3 L14-L20
		Level 3 M4 L4-L9
5	Using Mathematics and Computational Thinking	Level 3 M1 L4–L12
	<ul> <li>Organize simple data sets to reveal patterns that suggest relationships.</li> </ul>	Level 3 M2 L3
		Level 3 M2 L16–L19
		Level 3 M3 L7–L8
		Level 3 M4 L23–L27
6	Constructing Evaluations and Docigning Solutions	
	Constructing Explanations and Designing Solutions	Level 3 M1 L13–L15
	• Use evidence (e.g., observations, patterns) to support an explanation.	Level 3 M1 L13–L15 Level 3 M1 L18
	<ul> <li>Use evidence (e.g., observations, patterns) to support an explanation.</li> <li>Use evidence (e.g., observations, patterns) to construct an explanation.</li> </ul>	Level 3 M1 L13–L15 Level 3 M1 L18 Level 3 M1 L21–L29
	<ul> <li>Use evidence (e.g., observations, patterns) to support an explanation.</li> <li>Use evidence (e.g., observations, patterns) to construct an explanation.</li> <li>Generate and compare multiple solutions to a problem based on how well</li> </ul>	Level 3 M1 L13–L15 Level 3 M1 L18 Level 3 M1 L21–L29 Level 3 M2 L6–L8
	<ul> <li>Use evidence (e.g., observations, patterns) to support an explanation.</li> <li>Use evidence (e.g., observations, patterns) to construct an explanation.</li> </ul>	Level 3 M1 L13–L15 Level 3 M1 L18 Level 3 M1 L21–L29 Level 3 M2 L6–L8 Level 3 M2 L22–L28
	<ul> <li>Use evidence (e.g., observations, patterns) to support an explanation.</li> <li>Use evidence (e.g., observations, patterns) to construct an explanation.</li> <li>Generate and compare multiple solutions to a problem based on how well</li> </ul>	Level 3 M1 L13–L15 Level 3 M1 L18 Level 3 M1 L21–L29 Level 3 M2 L6–L8 Level 3 M2 L22–L28 Level 3 M3 L9–L11
	<ul> <li>Use evidence (e.g., observations, patterns) to support an explanation.</li> <li>Use evidence (e.g., observations, patterns) to construct an explanation.</li> <li>Generate and compare multiple solutions to a problem based on how well</li> </ul>	Level 3 M1 L13–L15 Level 3 M1 L18 Level 3 M1 L21–L29 Level 3 M2 L6–L8 Level 3 M2 L22–L28 Level 3 M3 L9–L11 Level 3 M3 L14–L15
	<ul> <li>Use evidence (e.g., observations, patterns) to support an explanation.</li> <li>Use evidence (e.g., observations, patterns) to construct an explanation.</li> <li>Generate and compare multiple solutions to a problem based on how well</li> </ul>	Level 3 M1 L13–L15 Level 3 M1 L18 Level 3 M1 L21–L29 Level 3 M2 L6–L8 Level 3 M2 L22–L28 Level 3 M3 L9–L11 Level 3 M3 L14–L15 Level 3 M3 L21–L28

Disciplina	ary Core Ideas	Aligned PhD
DC2 4	Te 100 (*	Science Lessons
PS2.A	Forces and Motion	Lavel 2 M4 L10 L10
	Each force acts on one particular object and has both strength and a	Level 3 M4 L10–L18
	direction. An object at rest typically has multiple forces acting on it, but	Level 3 M4 L28–L30
	they add to give zero net force on the object. Forces that do not sum to	
	zero can cause changes in the object's speed or direction of motion.	1 2 1 2 1 4 1 4 1 0
	The patterns of an object's motion in various situations can be observed	Level 3 M4 L1–L9
	and measured; when that past motion exhibits a regular pattern, future	Level 3 M4 L28–L30
PS2.B	motion can be predicted from it.  Type of Interactions	
F3Z.D	Objects in contact exert forces on each other.	Level 3 M4 L10–L18
	Objects in contact exert forces on each other.	Level 3 M4 L28–L30
	Electric and magnetic forces between a pair of objects do not require	Level 3 M4 L19–L30
	that the objects be in contact. The sizes of the forces in each situation	Level 5 Wi4 L19—L50
	depend on the properties of the objects and their distances apart and,	
	for forces between two magnets, on their orientation relative to each	
	other.	
LS1.B	Growth and Development of Organisms	
	Reproduction is essential to the continued existence of every kind of	Level 3 M3 L7–L8
	organism. Plants and animals have unique and diverse life cycles.	Level 3 M3 L23–L28
LS2.C	Ecosystem Dynamics, Functioning, and Resilience	
	When the environment changes in ways that affect a place's physical	Level 3 M2 L16–L28
	characteristics, temperature, or availability of resources, some	
	organisms survive and reproduce, others move to new locations, yet	
	others move into the transformed environment, and some die.	
LS2.D	Social Interactions and Group Behavior	
	Being part of a group helps animals obtain food, defend themselves, and	Level 3 M2 L13–L15
	cope with changes. Groups may serve different functions and vary	Level 3 M2 L22–L28
	dramatically in size.	
LS3.A	Inheritance of Traits	
	Many characteristics of organisms are inherited from their parents.	Level 3 M3 L14–L18
		Level 3 M3 L26–L28
	Other characteristics result from individuals' interactions with the	Level 3 M3 L9–L13
	environment, which can range from diet to learning. Many	Level 3 M3 L19–L20
	characteristics involve both inheritance and environment.	Level 3 M3 L26–L28
LS3.B	Variation of Traits	
	Different organisms vary in how they look and function because they	Level 3 M3 L1–L6
	have different inherited information.	Level 3 M3 L14–L18
		Level 3 M3 L23–L28
	The environment also affects the traits that an organism develops.	Level 3 M3 L9–L13
		Level 3 M3 L19–L20
164.4	Fuldamen of Common American and Discourts	Level 3 M3 L26–L28
LS4.A	Evidence of Common Ancestry and Diversity	Lavel 2 M2 LC 10
	Some kinds of plants and animals that once lived on Earth are no longer	Level 3 M2 L6–L8
	found anywhere.	Level 3 M2 L26–L28
	Fossils provide evidence about the types of organisms that lived long	Level 3 M2 L1–L5
	ago and also about the nature of their environments.	Level 3 M2 L26–L28

LS4.B	Natural Selection		
	Sometimes the differences in characteristics between individuals of the		Level 3 M3 L21–L28
	same species provide advantages in surviving, finding mates, and		
	reproducing.		
LS4.C	Adaptation		
	For any particular environment, some kinds of organisms survive well,		Level 3 M2 L1–L2
	some survive less well, and some cannot survive at all.		Level 3 M2 L9–L12
			Level 3 M2 L16–L19
			Level 3 M2 L22–L28
LS4.D	Biodiversity and Humans	1	
	Populations live in a variety of habitats, and change in those habitats		Level 3 M2 L16–L21
	affects the organisms living there.		Level 3 M2 L26-L28
ESS2.D	Weather and Climate		
	Scientists record patterns of the weather across different times and		Level 3 M1 L1–L15
	areas so that they can make predictions about what kind of weather		Level 3 M1 L19–L20
	might happen next.		Level 3 M1 L27–L29
	Climate describes a range of an area's typical weather conditions and		Level 3 M1 L11–L15
	the extent to which those conditions vary over years.		Level 3 M1 L27–L29
ESS3.B	Natural Hazards		
	A variety of natural hazards result from natural processes. Humans		Level 3 M1 L1–L3
	cannot eliminate natural hazards but can take steps to reduce their		Level 3 M1 L16–L29
	impacts.		
ETS1.A	Defining and Delimiting Engineering Problems		
	Possible solutions to a problem are limited by available materials and		Level 3 M1 L21–L26
	resources (constraints). The success of a designed solution is		
	determined by considering the desired features of a solution (criteria).		
	Different proposals for solutions can be compared on the basis of how		
	well each one meets the specified criteria for success or how well each		
	takes the constraints into account.		
ETS1.B	Developing Possible Solutions		
	Research on a problem should be carried out before beginning to design		Level 3 M1 L21–L26
	a solution. Testing a solution involves investigating how well it performs		
	under a range of likely conditions.		
	At whatever stage, communicating with peers about proposed solutions		Level 3 M2 L23–L27
	is an important part of the design process, and shared ideas can lead to		
	improved designs.		
	Tests are often designed to identify failure points or difficulties, which		Level 3 M4 L23–L27
	suggest the elements of the design that need to be improved.		
ETS1.C	Optimizing the Design Solution		
	Different solutions need to be tested in order to determine which of		Level 3 M4 L23-L27
	them best solves the problem, given the criteria and the constraints.

			Science Lessons	
1	Patterns		Level 3 M1 L11–L15	
	Similarities and differences in patterns can be used to sort and classify		Level 3 M1 L19-L20	
	natural phenomena.		Level 3 M1 L27-L29	
	Patterns of change can be used to make predictions.		Level 3 M2 L3-L8	
	Patterns can be used as evidence to support an explanation.		Level 3 M2 L13-L15	
			Level 3 M3 L1-L8	
			Level 3 M3 L14-L18	
			Level 3 M3 L26–L28	
			Level 3 M4 L1–L9	
			Level 3 M4 L28–L30	
2	Cause and Effect		Level 3 M1 L1–L3	
	Cause and effect relationships are routinely identified.		Level 3 M1 L16–L18	
	Cause and effect relationships are routinely identified and used to explain		Level 3 M1 L21–L29	
	change.		Level 3 M2 L9–L12	
	Cause and effect relationships are routinely identified, tested, and used to		Level 3 M2 L16–L28	
	explain change.		Level 3 M3 L9-L13	
	Events that occur together with regularity might or might not be a cause and		Level 3 M3 L19–L25	
	effect relationship.		Level 3 M4 L1–L3	
			Level 3 M4 L10-L30	
3	Scale, Proportion, and Quantity		Level 3 M1 L4–L10	
	Standard units are used to measure and describe physical quantities such as		Level 3 M2 L1–L2	
	weight, time, temperature, and volume.		Level 3 M3 L1–L3	
	Observable phenomena exist from very short to very long time periods.		Level 3 M3 L14–L15	
4	Systems and System Models		Level 3 M1 L1–L3	
	A system can be described in terms of its components and their interactions.		Level 3 M1 L16–L20	
			Level 3 M2 L6–L15	
			Level 3 M2 L20–L28	
			Level 3 M3 L9–L11	
			Level 3 M4 L1–L30	
6	Structure and Function		Level 3 M1 L21–L26	
	The shape and stability of structures of natural and designed objects are		Level 3 M2 L1–L3	
	related to their function(s).		Level 3 M2 L9–L12	
			Level 3 M3 L4–L6	
<u> </u>			Level 3 M3 L21–L28	
7	Stability and Change		Level 3 M1 L4–L15	
	Change is measured in terms of differences over time and may occur at		Level 3 M1 L27–L29	
	different rates.		Level 3 M2 L16–L19	
	Some systems appear stable, but over long periods of time will eventually		Level 3 M3 L7–L8	
	change.		Level 3 M3 L12–L13	
			Level 3 M3 L19–L20	
1			Level 3 M3 L26–L28	

Connections to Nature of Science		Aligned PhD	
		Science Lessons	
Scientific Knowledge Is Based on Empirical Evidence		Level 3 M3 L7–L8	
<ul> <li>Science findings are based on recognizing patterns.</li> </ul>		Level 3 M4 L4–L6	
Scientific Investigations Use a Variety of Methods		Level 3 M4 L1–L3	
<ul> <li>Science investigations use a variety of methods, tools, and techniques.</li> </ul>		Level 3 M4 L15–L16	
Science methods are determined by questions.			
Science Is a Human Endeavor		Level 3 M1 L21–L26	
Science affects everyday life.		Level 3 M3 L12–L13	
<ul> <li>Most scientists and engineers work in teams.</li> </ul>		Level 3 M4 L16–L18	
Men and women from all cultures and backgrounds choose careers as scientists			
and engineers.			
Scientific Knowledge Assumes an Order and Consistency in Natural Systems		Level 3 M3 L7–L8	
• Science assumes consistent patterns in natural systems.		Level 3 M4 L4–L6	
Science Is a Way of Knowing		Level 3 M3 L16-L18	
<ul> <li>Science is a way of knowing that is used by many people.</li> </ul>			

Connections to Engineering, Technology, and Applications of Science	Aligned PhD Science Lessons
Interdependence of Science, Engineering, and Technology	Level 3 M4 L23-L27
Scientific discoveries about the natural world can often lead to new and	
improved technologies, which are developed through the engineering design	
process.	
Knowledge of relevant scientific concepts and research findings is important in	
engineering.	
Science and technology support each other.	
Influence of Engineering, Technology, and Science on Society and the Natural World	Level 3 M1 L21-L26
Engineers improve existing technologies or develop new ones to increase their	Level 3 M4 L22-L27
benefits, decrease known risks, and meet societal demands.	
People's needs and wants change over time, as do their demands for new and	
improved technologies.	
When new technologies become available, they can bring about changes in the	
way people live and interact with one another.	

# Oregon Science Standards Correlation to PhD Science<sup>TM</sup>

Green indicates that <i>PhD Science</i> ™ fully addresses the standard within the grade level.
Blue indicates that <i>PhD Science</i> covers the standard but in a different grade level.
Yellow indicates that <i>PhD Science</i> partially covers the standard within the grade level.
Red indicates that <i>PhD Science</i> does not cover the standard.

Key: Module (M), Lesson (L)

## PhD Science Level 4

The Grade 4 Oregon Science Standards are fully covered by the Level 4 *PhD Science* curriculum. A detailed analysis of alignment appears in the table below.

Grade 4 Pe	rformance Expectations		Aligned PhD		
			Science Lessons		
4-PS3 Energ	4-PS3 Energy				
4-PS3-1	Use evidence to construct an explanation relating the speed of an		Level 4 M2 L6–L7		
	object to the energy of that object.		Level 4 M2 L24–L26		
4-PS3-2	Make observations to provide evidence that energy can be		Level 4 M2 L1–L5		
	transferred from place to place by sound, light, heat, and electric		Level 4 M2 L10–L11		
	currents.		Level 4 M2 L24–L26		
4-PS3-3	Ask questions and predict outcomes about the changes in energy that		Level 4 M2 L8-L9		
	occur when objects collide.		Level 4 M2 L24–L26		
4-PS3-4	Apply scientific ideas to design, test, and refine a device that converts		Level 4 M2 L12-L26		
	energy from one form to another.				
4-PS4 Wave	es and Their Applications in Technologies for Information Transfer				
4-PS4-1	Develop a model of waves to describe patterns in terms of amplitude		Level 4 M3 L7-L14		
	and wavelength and that waves can cause objects to move.		Level 4 M3 L29-L31		
4-PS4-2	Develop a model to describe that light reflecting from objects and		Level 4 M4 L1-L13		
	entering the eye allows objects to be seen.		Level 4 M4 L20–L26		
4-PS4-3	Generate and compare multiple solutions that use patterns to		Level 4 M4 L14–L19		
	transfer information.		Level 4 M4 L24–L26		
4-LS1 From	Molecules to Organisms: Structures and Processes				
4-LS1-1	Construct an argument that plants and animals have internal and		Level 4 M3 L1-L6		
	external structures that function to support survival, growth,		Level 4 M3 L20		
	behavior, and reproduction.		Level 4 M3 L26-L31		
4-LS1-2	Use a model to describe that animals receive different types of		Level 4 M3 L1-L6		
	information through their senses, process the information in their		Level 4 M3 L15–L25		
	brain, and respond to the information in different ways.		Level 4 M3 L29-L31		
4-ESS1 Eart	h's Place in the Universe				
4-ESS1-1	Identify evidence from patterns in rock formations and fossils in rock		Level 4 M1 L1–L5		
	layers to support an explanation for changes in a landscape over time.		Level 4 M1 L19–L20		
			Level 4 M1 L25-L27		

4-ESS2 Earth's Systems				
4-ESS2-1	Make observations and/or measurements to provide evidence of the		Level 4 M1 L6–L11	
	effects of weathering or the rate of erosion by water, ice, wind, or		Level 4 M1 L25-L27	
	vegetation.			
4-ESS2-2	Analyze and interpret data from maps to describe patterns of Earth's		Level 4 M1 L18-L20	
	features.		Level 4 M1 L25-L27	
4-ESS3 Earth	and Human Activity			
4-ESS3-1	Obtain and combine information to describe that energy and fuels are		Level 4 M1 L21-L27	
	derived from natural resources and that their uses affect the			
	environment.			
4-ESS3-2	Generate and compare multiple solutions to reduce the impacts of		Level 4 M1 L12-L17	
	natural Earth processes on humans.		Level 4 M1 L25-L27	
3-5-ETS1 Eng	ineering Design			
3-5-ETS1-1	Define a simple design problem reflecting a need or a want that		Level 4 M2 L17-L23	
	includes specified criteria for success and constraints on materials,			
	time, or cost.			
3-5-ETS1-2	Generate and compare multiple possible solutions to a problem		Level 4 M1 L12-L17	
	based on how well each is likely to meet the criteria and constraints			
	of the problem.			
3-5-ETS1-3	Plan and carry out fair tests in which variables are controlled and		Level 3 M2 L23-L27	
	failure points are considered to identify aspects of a model or		Level 3 M4 L23-L27	
	prototype that can be improved.		Level 5 M1 L18-L22	

Science and Engineering Practices		Aligned PhD Science Lessons
1	<ul> <li>Asking Questions and Defining Problems</li> <li>Ask questions that can be investigated and predict reasonable outcomes based on patterns such as cause and effect relationships.</li> <li>Define a simple design problem that can be solved through the development of an object, tool, process, or system and includes several criteria for success</li> </ul>	Level 4 M1 L1–L2 Level 4 M2 L1–L3 Level 4 M2 L8–L9 Level 4 M3 L1–L3 Level 4 M3 L15–L19
2	<ul> <li>and constraints on materials, time, or cost.</li> <li>Developing and Using Models</li> <li>Develop a model using an analogy, example, or abstract representation to describe a scientific principle.</li> <li>Develop a model to describe phenomena.</li> <li>Use a model to test interactions concerning the functioning of a natural system.</li> <li>Collaboratively develop and/or revise a model based on evidence that shows the relationships among variables for frequent and regular occurring events.</li> <li>Identify limitations of models.</li> </ul>	Level 4 M4 L1–L2 Level 4 M1 L1–L2 Level 4 M2 L1–L3 Level 4 M2 L8–L11 Level 4 M2 L15–L16 Level 4 M3 L1–L3 Level 4 M3 L7–L11 Level 4 M4 L1–L8 Level 4 M4 L10–L23

3	Planning and Carrying Out Investigations	Level 4 M1 L6–L11
	Plan and conduct an investigation collaboratively to produce data to serve as	Level 4 M1 L21–L22
	the basis for evidence, using fair tests in which variables are controlled and	Level 4 M2 L6–L7
	the number of trials considered.	Level 4 M2 L10–L14
	Make observations to produce data to serve as the basis for evidence for an	Level 4 M3 L15–L19
	explanation of a phenomenon or test a design	Level 4 M4 L7–L9
	Make observations and/or measurements to produce data to serve as the	Level 4 M4 L14–L16
	basis for evidence for an explanation of a phenomenon.	Level 4 M4 L20–L23
	Evaluate appropriate methods and/or tools for collecting data.	
4	Analyzing and Interpreting Data	Level 4 M1 L12–L20
	Analyze and interpret data to make sense of phenomena using logical	Level 4 M1 L23–L24
	reasoning.	Level 4 M4 L10–L13
5	Using Mathematics and Computational Thinking	Level 4 M2 L8–L9
	<ul> <li>Describe, measure, estimate, and/or graph quantities (e.g., area, volume,</li> </ul>	
	weight, time) to address scientific and engineering questions and problems.	
6	Constructing Explanations and Designing Solutions	Level 4 M1 L3–L7
	<ul> <li>Construct an explanation of observed relationships.</li> </ul>	Level 4 M1 L12–L18
	Use evidence (e.g., measurements, observations, patterns) to construct an	Level 4 M1 L21–L22
	explanation.	Level 4 M1 L25–L27
	<ul> <li>Apply scientific ideas to solve design problems.</li> </ul>	Level 4 M2 L4–L5
	<ul> <li>Identify the evidence that supports particular points in an explanation.</li> </ul>	Level 4 M2 L15–L26
	Generate and compare multiple solutions to a problem based on how well	Level 4 M3 L24–L25
	they meet the criteria and constraints of the design problem and solution.	Level 4 M3 L29–L31
	and, most the street and constraints of the design problem and solution.	Level 4 M4 L14–L26
7	Engaging in Argument from Evidence	Level 4 M3 L4–L5
	<ul> <li>Construct an argument with evidence, data, and/or a model.</li> </ul>	Level 4 M3 L21–L23
	Compare and refine arguments based on an evaluation of the evidence	Level 4 M3 L26–L28
	presented.	Level 4 M4 L7–L8
	Respectfully provide and receive critiques from peers about a proposed	_
	procedure, explanation, or model by citing relevant evidence and posing	
	specific questions.	
8	Obtaining, Evaluating, and Communicating Information	Level 4 M1 L3–L5
	Obtain and combine information from books and other reliable media to	Level 4 M1 L23–L24
	explain phenomena.	Level 4 M3 L4–L6
	Read and comprehend grade-appropriate complex texts and/or other	Level 4 M3 L10–L11
	reliable media to summarize and obtain scientific and technical ideas and	Level 4 M3 L20–L23
	describe how they are supported by evidence.	Level 4 M3 L26–L28
	<ul> <li>Communicate scientific and/or technical information orally and/or in written</li> </ul>	Level 4 M4 L17–L19
	formats, including various forms of media as well as tables, diagrams, and	
	charts.	
Щ	urarus.	

Disciplina	ary Core Ideas	Aligned PhD
		Science Lessons
PS3.A	Definitions of Energy	
	The faster a given object is moving, the more energy it possesses.	Level 4 M2 L6–L9
		Level 4 M2 L12–L16
		Level 4 M2 L24–L26
	Energy can be moved from place to place by moving objects or through	Level 4 M2 L1–L3
	sound, light, or electric currents.	Level 4 M2 L10–L11
		Level 4 M2 L15–L16
		Level 4 M2 L24–L26
PS3.B	Conservation of Energy and Energy Transfer	1444214.15
	Energy is present whenever there are moving objects, sound, light, or	Level 4 M2 L1–L5
	heat. When objects collide, energy can be transferred from one object	Level 4 M2 L8–L9
	to another, thereby changing their motion. In such collisions, some	Level 4 M2 L24–L26
	energy is typically also transferred to the surrounding air; as a result, the air gets heated and sound is produced.	
	Light also transfers energy from place to place.	Level 4 M2 L10–L11
		Level 4 M2 L24–L26
	Energy can also be transferred from place to place by electric currents,	Level 4 M2 L1–L3
	which can then be used locally to produce motion, sound, heat, or light.	Level 4 M2 L10–L26
	The currents may have been produced to begin with by transforming	
	the energy of motion into electrical energy.	
PS3.C	Relationship between Energy and Forces	
	When objects collide, the contact forces transfer energy so as to change	Level 4 M2 L8–L9
	the objects' motions.	Level 4 M2 L24–L26
PS3.D	Energy in Chemical Processes and Everyday Life	
	The expression "produce energy" typically refers to the conversion of	Level 4 M2 L12–L14
	stored energy into a desired form for practical use.	Level 4 M2 L24–L26
PS4.A	Wave Properties	
	Waves, which are regular patterns of motion, can be made in water by	Level 4 M3 L7–L11
	disturbing the surface. When waves move across the surface of deep	
	water, the water goes up and down in place; it does not move in the	
	direction of the wave except when the water meets the beach.	
	Waves of the same type can differ in amplitude (height of the wave) and	Level 4 M3 L7–L11
_	wavelength (spacing between wave peaks).	Level 4 M3 L29–L31
PS4.B	Electromagnetic Radiation	T
	An object can be seen when light reflected from its surface enters the	Level 4 M4 L1–L13
2012	eyes.	Level 4 M4 L20–L26
PS4.C	Information Technologies and Instrumentation	I
	Digitized information can be transmitted over long distances without	Level 4 M4 L14–L19
	significant degradation. High-tech devices, such as computers or cell	Level 4 M4 L24–L26
	phones, can receive and decode information—convert it from digitized	
	form to voice—and vice versa.	
LS1.A	Structure and Function	T
	Plants and animals have both internal and external structures that serve	Level 4 M3 L1–L6
	various functions in growth, survival, behavior, and reproduction.	Level 4 M3 L20
		Level 4 M3 L26–L31

LS1.D	Information Processing	
	Different sense receptors are specialized for particular kinds of	Level 4 M3 L1-L6
	information, which may be then processed by the animal's brain.	Level 4 M3 L15-L25
	Animals are able to use their perceptions and memories to guide their	Level 4 M3 L29-L31
	actions.	Level 4 M4 L10-L13
ESS1.C	The History of Planet Earth	
	Local, regional, and global patterns of rock formations reveal changes	Level 4 M1 L1-L5
	over time due to earth forces, such as earthquakes. The presence and	Level 4 M1 L19-L20
	location of certain fossil types indicate the order in which rock layers	Level 4 M1 L25-L27
	were formed.	
ESS2.A	Earth Materials and Systems	
	Rainfall helps to shape the land and affects the types of living things	Level 4 M1 L6–L11
	found in a region. Water, ice, wind, living organisms, and gravity break	Level 4 M1 L25-L27
	rocks, soils, and sediments into smaller particles and move them	
	around.	
ESS2.B	Plate Tectonics and Large-Scale System Interactions	
	The locations of mountain ranges, deep ocean trenches, ocean floor	Level 4 M1 L18–L20
	structures, earthquakes, and volcanoes occur in patterns. Most	Level 4 M1 L25-L27
	earthquakes and volcanoes occur in bands that are often along the	
	boundaries between continents and oceans. Major mountain chains	
	form inside continents or near their edges. Maps can help locate the	
	different land and water features areas of Earth.	
ESS2.E	Biogeology	
	Living things affect the physical characteristics of their regions.	Level 4 M1 L6-L11
		Level 4 M1 L25–L27
ESS3.A	Natural Resources	Level 4 M1 L25–L27
ESS3.A	Energy and fuels that humans use are derived from natural sources, and	Level 4 M1 L25–L27 Level 4 M1 L21–L27
ESS3.A	Energy and fuels that humans use are derived from natural sources, and their use affects the environment in multiple ways. Some resources are	
	Energy and fuels that humans use are derived from natural sources, and their use affects the environment in multiple ways. Some resources are renewable over time, and others are not.	
ESS3.A	Energy and fuels that humans use are derived from natural sources, and their use affects the environment in multiple ways. Some resources are renewable over time, and others are not.  Natural Hazards	Level 4 M1 L21–L27

Defining and Delimiting Engineering Problems  Possible solutions to a problem are limited by available materials and resources (constraints). The success of a designed solution is determined by considering the desired features of a solution (criteria). Different proposals for solutions can be compared on the basis of how well each one meets the specified criteria for success or how well each takes the constraints into account.  Developing Possible Solutions  Research on a problem should be carried out before beginning to design a solution. Testing a solution involves investigating how well it performs under a range of likely conditions. # Oregon Science Standards Correlation to PhD Science<sup>TM</sup>

Green indicates that <i>PhD Science</i> ™ fully addresses the standard within the grade level.
Blue indicates that <i>PhD Science</i> covers the standard but in a different grade level.
Yellow indicates that <i>PhD Science</i> partially covers the standard within the grade level.
Red indicates that <i>PhD Science</i> does not cover the standard.

Key: Module (M), Lesson (L)

## **PhD Science** Level 5

The Grade 5 Oregon Science Standards are fully covered by the Level 5 *PhD Science* curriculum. A detailed analysis of alignment appears in the table below.

Grade 5 Perfo	ormance Expectations		Aligned PhD
			Science Lessons
5-PS1 Matter	5-PS1 Matter and Its Interactions		
5-PS1-1	Develop a model to describe that matter is made of particles too		Level 5 M1 L5-L10
	small to be seen.		Level 5 M1 L23-L26
5-PS1-2	Measure and graph quantities to provide evidence that regardless of		Level 5 M1 L9-L17
	the type of change that occurs when heating, cooling, or mixing		Level 5 M1 L23-L26
	substances, the total weight of matter is conserved.		
5-PS1-3	Make observations and measurements to identify materials based on		Level 5 M1 L1-L4
	their properties.		Level 5 M1 L11–L17
			Level 5 M1 L23-L26
5-PS1-4	Conduct an investigation to determine whether the mixing of two or		Level 5 M1 L1-L2
	more substances results in new substances.		Level 5 M1 L13-L26
5-PS2 Motion	and Stability: Forces and Interactions		
5-PS2-1	Support an argument that the gravitational force exerted by Earth on		Level 5 M4 L3-L4
	objects is directed down.		Level 5 M4 L24-L26
5-PS3 Energy			
5-PS3-1	Use models to describe that energy in animals' food (used for body		Level 5 M2 L15-L19
	repair, growth, motion, and to maintain body warmth) was once		Level 5 M2 L24-L26
	energy from the sun.		
5-LS1 From N	Nolecules to Organisms: Structures and Processes		
5-LS1-1	Support an argument that plants get the materials they need for		Level 5 M2 L3-L5
	growth chiefly from air and water.		Level 5 M2 L20-L26
5-LS2 Ecosyst	ems: Interactions, Energy, and Dynamics		
5-LS2-1	Develop a model to describe the movement of matter among plants,		Level 5 M2 L1-L2
	animals, decomposers, and the environment.		Level 5 M2 L6-L14
			Level 5 M2 L24-L26
5-ESS1 Earth'	s Place in the Universe		
5-ESS1-1	Support an argument that the apparent brightness of the sun and		Level 5 M4 L18-L19
	stars is due to their relative distances from Earth.		Level 5 M4 L24-L26

Represent data in graphical displays to reveal patterns of daily		Level 5 M4 L1–L2				
changes in length and direction of shadows, day and night, and the		Level 5 M4 L5-L17				
seasonal appearance of some stars in the night sky.		Level 5 M4 L20-L26				
5-ESS2 Earth's Systems						
Develop a model using an example to describe ways the geosphere,		Level 5 M3 L1-L3				
biosphere, hydrosphere, and/or atmosphere interact.		Level 5 M3 L6-L13				
		Level 5 M3 L19-L27				
Describe and graph the amounts and percentages of salt water and		Level 5 M3 L4–L5				
fresh water in various reservoirs to provide evidence about the		Level 5 M3 L19-L27				
distribution of water on Earth.						
and Human Activity						
Obtain and combine information about ways individual communities		Level 5 M3 L14-L18				
use science ideas to protect the Earth's resources and environment.		Level 5 M3 L24–L27				
gineering Design						
Define a simple design problem reflecting a need or a want that		Level 3 M1 L21–L26				
includes specified criteria for success and constraints on materials,		Level 3 M4 L23-L27				
time, or cost.		Level 4 M2 L17-L23				
Generate and compare multiple possible solutions to a problem		Level 5 M3 L19-L23				
based on how well each is likely to meet the criteria and constraints						
of the problem.						
Plan and carry out fair tests in which variables are controlled and		Level 5 M1 L18-L22				
failure points are considered to identify aspects of a model or						
prototype that can be improved.						
	changes in length and direction of shadows, day and night, and the seasonal appearance of some stars in the night sky. 	Level 5 M2 L8–L9			
	Level 5 M2 L15-L19			
motion.	Level 5 M2 L24-L26			
Plants acquire their material for growth chiefly from air and water.	Level 5 M2 L3–L5			
	Level 5 M2 L24-L26			
LS2.A Interdependent Relationships in Ecosystems				
	Level 5 M2 L1–L2			
Organisms are related in food webs in which some animals eat plants for	Level 5 M2 L8-L14			
food and other animals eat the animals that eat plants. Some organisms,	Level 5 M2 L20			
such as fungi and bacteria, break down dead organisms (both plants or	Level 5 M2 L24-L26			
plants' parts and animals) and therefore operate as "decomposers."				
Decomposition eventually restores (recycles) some materials back to the				
soil. Organisms can survive only in environments in which their				
particular needs are met. A healthy ecosystem is one in which multiple				
species of different types are each able to meet their needs in a				
relatively stable web of life. Newly introduced species can damage the				
balance of an ecosystem.				
LS2.B Cycles of Matter and Energy Transfer in Ecosystems				
	Level 5 M2 L6–L7			
	Level 5 M2 L10-L14			
	Level 5 M2 L24-L26			
solid) back into the environment.				

ESS1.A	The Universe and Its Stars		
	The sun is a star that appears larger and brighter than other stars		Level 5 M4 L18-L19
	because it is closer. Stars range greatly in their distance from Earth.		Level 5 M4 L24–L26
ESS1.B	Earth and the Solar System		
	The orbits of Earth around the sun and of the moon around Earth,		Level 5 M4 L1–L2
	together with the rotation of Earth about an axis between its North and		Level 5 M4 L5–L18
	South poles, cause observable patterns. These include day and night;		Level 5 M4 L20–L26
	daily changes in the length and direction of shadows; and different		
	positions of the sun, moon, and stars at different times of the day,		
	month, and year.		
ESS2.A	Earth Materials and Systems		T
	Earth's major systems are the geosphere (solid and molten rock, soil,		Level 5 M3 L1–L13
	and sediments), the hydrosphere (water and ice), the atmosphere (air),		Level 5 M3 L24–L27
	and the biosphere (living things, including humans). These systems		
	interact in multiple ways to affect Earth's surface materials and		
	processes. The ocean supports a variety of ecosystems and organisms,		
	shapes landforms, and influences climate. Winds and clouds in the		
	atmosphere interact with the landforms to determine patterns of		
ESS2.C	weather.  The Roles of Water in Earth's Surface Processes		
E332.C	Nearly all of Earth's available water is in the ocean. Most fresh water is		Level 5 M3 L4–L5
	in glaciers or underground; only a tiny fraction is in streams, lakes,		Level 5 M3 L24–L27
	wetlands, and the atmosphere.		Level 5 IVIS L24-L27
ESS3.C	Human Impacts on Earth Systems		
	Human activities in agriculture, industry, and everyday life have had		Level 5 M3 L14–L27
	major effects on the land, vegetation, streams, ocean, air, and even		
	outer space. But individuals and communities are doing things to help		
	protect Earth's resources and environments.		
ETS1.A	Defining and Delimiting Engineering Problems		1
	Possible solutions to a problem are limited by available materials and		Level 5 M2 L21–L23
	resources (constraints). The success of a designed solution is		
	determined by considering the desired features of a solution (criteria).		
	Different proposals for solutions can be compared on the basis of how		
	well each one meets the specified criteria for success or how well each		
	takes the constraints into account.		
ETS1.B	Developing Possible Solutions	1	T
	Research on a problem should be carried out before beginning to design		Level 5 M3 L18–L22
	a solution. Testing a solution involves investigating how well it performs		
	under a range of likely conditions.		
	At whatever stage, communicating with peers about proposed solutions		Level 5 M2 L21–L23
	is an important part of the design process, and shared ideas can lead to		Level 5 M3 L19–L23
	improved designs.		
	Tests are often designed to identify failure points or difficulties, which		Level 5 M1 L19–L23
	suggest the elements of the design that need to be improved.		
ETS1.C	Optimizing the Design Solution		T
	Different solutions need to be tested in order to determine which of		Level 5 M1 L18–L22
	them best solves the problem, given the criteria and the constraints.

			Science Lessons
1	<ul> <li>Similarities and differences in patterns can be used to sort, classify, communicate, and analyze simple rates of change for natural phenomena.</li> <li>Patterns can be used as evidence to support an explanation.</li> </ul>		Level 5 M1 L7–L8 Level 5 M2 L1–L5 Level 5 M2 L8–L9 Level 5 M2 L15–L17 Level 5 M3 L6–L9 Level 5 M4 L1–L17 Level 5 M4 L20–L26
2	<ul> <li>Cause and Effect</li> <li>Cause and effect relationships are routinely identified and used to explain change.</li> <li>Cause and effect relationships are routinely identified, tested, and used to explain change.</li> </ul>		Level 5 M1 L1–L2 Level 5 M1 L5–L6 Level 5 M1 L9–L10 Level 5 M1 L18–L22 Level 5 M2 L3–L7 Level 5 M2 L12–L13 Level 5 M2 L18–L23 Level 5 M3 L6–L8 Level 5 M3 L12–L18 Level 5 M4 L5–L6 Level 5 M4 L24–L26
3	<ul> <li>Scale, Proportion, and Quantity</li> <li>Natural objects exist from the very small to the immensely large.</li> <li>Standard units are used to measure and describe physical quantities such as weight, time, temperature, and volume.</li> </ul>		Level 5 M1 L3–L4 Level 5 M1 L13–L17 Level 5 M1 L23–L26 Level 5 M2 L10–L11 Level 5 M3 L10–L11 Level 5 M3 L24–L27 Level 5 M4 L18–L19 Level 5 M4 L24–L26
4	<ul> <li>Systems and System Models</li> <li>A system is a group of related parts that make up a whole and can carry out functions its individual parts cannot.</li> <li>A system can be described in terms of its components and their interactions.</li> </ul>		Level 5 M1 L3–L4 Level 5 M1 L15–L17 Level 5 M2 L1–L2 Level 5 M2 L6–L11 Level 5 M2 L14 Level 5 M2 L18–L19 Level 5 M2 L24–L26 Level 5 M3 L1–L9 Level 5 M3 L12–L13 Level 5 M3 L19–L27 Level 5 M4 L1–L2 Level 5 M4 L7–L23
5	<ul> <li>Matter is made of particles.</li> <li>Energy can be transferred in various ways and between objects.</li> <li>Matter flows and cycles can be tracked in terms of the weight of the substances before and after a process occurs. The total weight of the substances does not change. This is what is meant by conservation of matter.</li> <li>Matter is transported into, out of, and within systems.</li> </ul>		Level 5 M1 L5–L8 Level 5 M1 L13–L14 Level 5 M1 L23–L26 Level 5 M2 L6–L11 Level 5 M2 L14–L19 Level 5 M2 L24–L26 Level 5 M3 L10–L11 Level 5 M4 L3–L4

7	Stability and Change	Level 5 M1 L1–L2
	Change is measured in terms of differences over time and may occur at	Level 5 M1 L9-L12
	different rates.	Level 5 M1 L18-L26
		Level 5 M2 L12–L13
		Level 5 M2 L20
		Level 5 M2 L24-L26
		Level 5 M3 L14-L18
		Level 5 M4 L5-L6
		Level 5 M4 L9–L12

Connections to Nature of Science		Aligned PhD	
		Science Lessons	
Scientific Investigations Use a Variety of Methods		Level 5 M4 L5–L6	
Science methods are determined by questions.			
Scientific Knowledge Assumes an Order and Consistency in Natural Systems		Level 5 M1 L7–L8	
Science assumes consistent patterns in natural systems.		Level 5 M4 L14–L15	
Basic laws of nature are the same everywhere in the universe.			
Science Models, Laws, Mechanisms, and Theories Explain Natural Phenomena		Level 5 M4 L1–L2	
Science explanations describe the mechanisms for natural events.		Level 5 M4 L7–L8	
		Level 5 M4 L13	
Science Addresses Questions about the Natural and Material World		Level 5 M3 L10–L11	
Science findings are limited to questions that can be answered with empirical		Level 5 M4 L5–L6	
evidence.			
Science Is a Way of Knowing		Level 5 M3 L6–L8	
Science is both a body of knowledge and processes that add new knowledge.		Level 5 M4 L7–L8	
Science Is a Human Endeavor		Level 5 M3 L19–L23	
Creativity and imagination are important to science.			
Scientific Knowledge Is Open to Revision in Light of New Evidence		Level 5 M4 L14–L15	
Science explanations can change based on new evidence.			
Scientific Knowledge Is Based on Empirical Evidence		Level 5 M4 L5-L8	
Science findings are based on recognizing patterns.		Level 5 M4 L14–L15	
Scientists use tools and technologies to make accurate measurements and			
observations.			

Connections to Engineering, Technology, and Applications of Science		Aligned PhD
		Science Lessons
Influence of Engineering, Technology, and Science on Society and the Natural World		Level 5 M3 L19–L23
People's needs and wants change over time, as do their demands for new and		
improved technologies.		
Engineers improve existing technologies or develop new ones to increase their		
benefits, decrease known risks, and meet societal demands.		
Interdependence of Science, Engineering, and Technology		Level 5 M4 L7–L8
Tools and instruments are used to answer scientific questions, while scientific		
discoveries lead to the development of new technologies.
