
Precalculus | Tennessee Academic Standards for Mathematics Correlation to *Eureka Math*®

About *Eureka Math*

Created by Great Minds®, a mission-driven Public Benefit Corporation, *Eureka Math*® helps teachers deliver unparalleled math instruction that provides students with a deep understanding and fluency in math. Crafted by teachers and math scholars, the curriculum carefully sequences the mathematical progressions to maximize coherence from Prekindergarten through Precalculus—a principle tested and proven to be essential in students’ mastery of math.

Teachers and students using *Eureka Math* find the trademark “Aha!” moments in *Eureka Math* to be a source of joy and inspiration, lesson after lesson, year after year.

Aligned

Great Minds offers detailed analyses that demonstrate how each grade of *Eureka Math* aligns with specific state standards. Access these free alignment studies at greatminds.org/state-studies.

Data

Schools and districts nationwide are experiencing student growth and impressive test scores after using *Eureka Math*. See their stories and data at greatminds.org/data.

Full Suite of Resources

Great Minds offers the *Eureka Math* curriculum as PDF downloads for free, noncommercial use. Access the free PDFs at greatminds.org/math/curriculum.

The teacher-writers who created the curriculum have also developed essential resources, available only from Great Minds, including the following:

- Printed material in English and Spanish
- Digital resources
- Professional development
- Classroom tools and manipulatives
- Teacher support materials
- Parent resources

Standards for Mathematical Practice	Aligned Components of <i>Eureka Math</i>
<p>MP.1 Make sense of problems and persevere in solving them.</p>	<p>Lessons in every module engage students in mathematical practices. These are designated in the Module Overview and labeled in lessons. For example:</p>
<p>MP.2 Reason abstractly and quantitatively.</p>	<p>A STORY OF FUNCTIONS Lesson 10 M2 <small>PRECALCULUS AND ADVANCED TOPICS</small></p>
<p>MP.3 Construct viable arguments and critique the reasoning of others.</p>	<div style="border: 1px solid black; padding: 5px;"> <p>c. Why is it the case that any two matrices in the form $\begin{pmatrix} a & -b \\ b & a \end{pmatrix}$ have products that are equal regardless of the order in which they are multiplied?</p> <p><i>Matrices in this form represent the geometric effect of complex multiplication. Multiplying a complex number z by a complex number α and then by a complex number β gives the same answer as multiplying by β and then α; that is, $\beta(\alpha z) = \alpha(\beta z)$; thus, the corresponding matrix multiplication yields the same product.</i></p> </div>
<p>MP.4 Model with mathematics.</p>	<ul style="list-style-type: none"> ▪ What did you discover about the matrices above? (Allow several groups to share their work.) <ul style="list-style-type: none"> ▫ $AB = BA$
<p>MP.5 Use appropriate tools strategically.</p>	<ul style="list-style-type: none"> ▪ Does this mean matrix multiplication is commutative? Explain. <ul style="list-style-type: none"> ▫ No, this is a special case because the matrices are in the form $\begin{pmatrix} a & -b \\ b & a \end{pmatrix}$.
<p>MP.6 Attend to precision.</p>	<ul style="list-style-type: none"> ▪ What is the relationship between these matrices and complex numbers? <ul style="list-style-type: none"> ▫ Matrices in this form can be used to represent a corresponding complex number. Multiplying these matrices is the same as multiplying two complex numbers.
<p>MP.7 Look for and make use of structure.</p>	<ul style="list-style-type: none"> ▪ Is the multiplication of two complex numbers commutative? <ul style="list-style-type: none"> ▫ Yes, two matrices in the form $\begin{pmatrix} a & -b \\ b & a \end{pmatrix}$ have the same product, but this does not mean that matrix multiplication is commutative.
<p>MP.8 Look for and express regularity in repeated reasoning.</p>	

Number Expressions

P.N.NE.A Represent, interpret, compare, and simplify number expressions.

Tennessee Academic Standards for Mathematics

Aligned Components of *Eureka Math*

<p>P.N.NE.A.1</p> <p>Use the laws of exponents and logarithms to expand or collect terms in expressions; simplify expressions or modify them in order to analyze them or compare them.</p>	<p>Algebra II M3 Lesson 1: Integer Exponents</p> <p>Algebra II M3 Lesson 4: Properties of Exponents and Radicals</p> <p>Algebra II M3 Lesson 10: Building Logarithmic Tables</p> <p>Algebra II M3 Lesson 11: The Most Important Property of Logarithms</p> <p>Algebra II M3 Lesson 12: Properties of Logarithms</p> <p>Algebra II M3 Lesson 14: Solving Logarithmic Equations</p> <p>Algebra II M3 Lesson 15: Why Were Logarithms Developed?</p>
<p>P.N.NE.A.2</p> <p>Understand the inverse relationship between exponents and logarithms and use this relationship to solve problems involving logarithms and exponents.</p>	<p>Algebra II M3 Lesson 19: The Inverse Relationship Between Logarithmic and Exponential Functions</p> <p>Precalculus and Advanced Topics M3 Lesson 20: Inverses of Logarithmic and Exponential Functions</p> <p>Precalculus and Advanced Topics M3 Lesson 21: Logarithmic and Exponential Problem Solving</p>
<p>P.N.NE.A.3</p> <p>Classify real numbers and order real numbers that include transcendental expressions, including roots and fractions of π and e.</p>	<p><i>Supplemental material is necessary to address this standard.</i></p>
<p>P.N.NE.A.4</p> <p>Simplify complex radical and rational expressions; discuss and display understanding that rational numbers are dense in the real numbers and the integers are not.</p>	<p><i>Supplemental material is necessary to address this standard.</i></p>

Tennessee Academic Standards for Mathematics

Aligned Components of *Eureka Math*

<p>P.N.NE.A.5</p> <p>Understand that rational expressions form a system analogous to the rational numbers, closed under addition, subtraction, multiplication, and division by a nonzero rational expression; add, subtract, multiply, and divide rational expressions.</p>	<p>Precalculus and Advanced Topics M3 Lesson 10: The Structure of Rational Expressions</p> <p>Precalculus and Advanced Topics M3 Lesson 11: Rational Functions</p>
--	--

The Complex Number System

P.N.CN.A Perform complex number arithmetic and understand the representation on the complex plane.

Tennessee Academic Standards for Mathematics

Aligned Components of *Eureka Math*

<p>P.N.CN.A.1</p> <p>Know there is a complex number i such that $i^2 = -1$, and every complex number has the form $a + bi$ with a and b real.</p>	<p>Algebra II M1 Lesson 37: A Surprising Boost from Geometry</p> <p>Precalculus and Advanced Topics M1 Lesson 5: An Appearance of Complex Numbers</p>
<p>P.N.CN.A.2</p> <p>Perform arithmetic operations with complex numbers expressing answers in the form $a + bi$.</p>	<p>Algebra II M1 Lesson 37: A Surprising Boost from Geometry</p> <p>Precalculus and Advanced Topics M1 Lesson 4: An Appearance of Complex Numbers</p> <p>Precalculus and Advanced Topics M1 Lesson 5: An Appearance of Complex Numbers</p>
<p>P.N.CN.A.3</p> <p>Find the conjugate of a complex number; use conjugates to find moduli and quotients of complex numbers.</p>	<p>Precalculus and Advanced Topics M1 Lesson 7: Complex Number Division</p> <p>Precalculus and Advanced Topics M1 Lesson 8: Complex Number Division</p> <p>Precalculus and Advanced Topics M1 Lesson 9: The Geometric Effect of Some Complex Arithmetic</p> <p>Precalculus and Advanced Topics M1 Lesson 17: The Geometric Effect of Multiplying by a Reciprocal</p>

**Tennessee Academic Standards
for Mathematics**

Aligned Components of *Eureka Math*

<p>P.N.CN.A.4</p> <p>Represent complex numbers on the complex plane in rectangular and polar form (including real and imaginary numbers), and explain why the rectangular and polar forms of a given complex number represent the same number.</p>	<p>Precalculus and Advanced Topics M1 Lesson 4: An Appearance of Complex Numbers</p> <p>Precalculus and Advanced Topics M1 Lesson 5: An Appearance of Complex Numbers</p> <p>Precalculus and Advanced Topics M1 Lesson 6: Complex Numbers as Vectors</p> <p>Precalculus and Advanced Topics M1 Lesson 8: Complex Number Division</p> <p>Precalculus and Advanced Topics M1 Topic B: Complex Number Operations and Transformations</p> <p>Precalculus and Advanced Topics M1 Lesson 18: Exploiting the Connection to Trigonometry</p> <p>Precalculus and Advanced Topics M1 Lesson 19: Exploiting the Connection to Trigonometry</p> <p>Precalculus and Advanced Topics M1 Lesson 20: Exploiting the Connection to Cartesian Coordinates</p>
<p>P.N.CN.A.5</p> <p>Represent addition, subtraction, multiplication, and conjugation of complex numbers geometrically on the complex plane; use properties of this representation for computation (for example, $(-1 + 3i)^3 = 8$ because $(-1 + 3i)$ has modulus 2 and argument 120°).</p>	<p>Precalculus and Advanced Topics M1 Lesson 6: Complex Numbers as Vectors</p> <p>Precalculus and Advanced Topics M1 Lesson 9: The Geometric Effect of Some Complex Arithmetic</p> <p>Precalculus and Advanced Topics M1 Lesson 10: The Geometric Effect of Some Complex Arithmetic</p> <p>Precalculus and Advanced Topics M1 Lesson 14: Discovering the Geometric Effect of Complex Multiplication</p> <p>Precalculus and Advanced Topics M1 Lesson 15: Justifying the Geometric Effect of Complex Multiplication</p> <p>Precalculus and Advanced Topics M1 Lesson 16: Representing Reflections with Transformations</p> <p>Precalculus and Advanced Topics M1 Lesson 17: The Geometric Effect of Multiplying by a Reciprocal</p> <p>Precalculus and Advanced Topics M1 Lesson 18: Exploiting the Connection to Trigonometry</p> <p>Precalculus and Advanced Topics M1 Lesson 19: Exploiting the Connection to Trigonometry</p> <p>Precalculus and Advanced Topics M1 Lesson 20: Exploiting the Connection to Cartesian Coordinates</p>

**Tennessee Academic Standards
for Mathematics**

Aligned Components of *Eureka Math*

<p>P.N.CN.A.6</p> <p>Calculate the distance between numbers in the complex plane as the modulus of the difference, and the midpoint of a segment as the average of the numbers at its endpoints.</p>	<p>Precalculus and Advanced Topics M1 Lesson 11: Distance and Complex Numbers</p> <p>Precalculus and Advanced Topics M1 Lesson 12: Distance and Complex Numbers</p>
---	---

The Complex Number System

P.N.CN.B Use complex numbers in polynomial identities and equations.

**Tennessee Academic Standards
for Mathematics**

Aligned Components of *Eureka Math*

<p>P.N.CN.B.7</p> <p>Extend polynomial identities to the complex numbers (for example, rewrite $x^2 + 4$ as $(x + 2i)(x - 2i)$).</p>	<p>Precalculus and Advanced Topics M3 Lesson 1: Solutions to Polynomial Equations</p> <p>Precalculus and Advanced Topics M3 Lesson 2: Does Every Complex Number Have a Square Root?</p> <p>Precalculus and Advanced Topics M3 Lesson 3: Roots of Unity</p>
<p>P.N.CN.B.8</p> <p>Solve quadratic equations with real coefficients that have complex solutions.</p>	<p>Algebra II M1 Lesson 38: Complex Numbers as Solutions to Equations</p> <p>Algebra II M1 Lesson 39: Factoring Extended to the Complex Realm</p>
<p>P.N.CN.B.9</p> <p>Know the Fundamental Theorem of Algebra; show that it is true for quadratic polynomials.</p>	<p>Algebra II M1 Lesson 40: Obstacles Resolved—A Surprising Result</p> <p>Precalculus and Advanced Topics M3 Lesson 1: Solutions to Polynomial Equations</p> <p>Precalculus and Advanced Topics M3 Lesson 2: Does Every Complex Number Have a Square Root?</p> <p>Precalculus and Advanced Topics M3 Lesson 3: Roots of Unity</p>

Vector and Matrix Quantities

P.N.VM.A Represent and model with vector quantities.

Tennessee Academic Standards for Mathematics	Aligned Components of <i>Eureka Math</i>
<p>P.N.VM.A.1</p> <p>Recognize vector quantities as having both magnitude and direction. Represent vector quantities by directed line segments, and use appropriate symbols for vectors and their magnitudes (e.g., \mathbf{v}, \mathbf{v}, $\ \mathbf{v}\$, \vec{v}).</p>	<p>Precalculus and Advanced Topics M2 Lesson 17: Vectors in the Coordinate Plane</p> <p>Precalculus and Advanced Topics M2 Lesson 18: Vectors and Translation Maps</p> <p>Precalculus and Advanced Topics M2 Lesson 20: Vectors and Stone Bridges</p>
<p>P.N.VM.A.2</p> <p>Find the components of a vector by subtracting the coordinates of an initial point from the coordinates of a terminal point.</p>	<p>Precalculus and Advanced Topics M2 Lesson 19: Directed Line Segments and Vectors</p>
<p>P.N.VM.A.3</p> <p>Solve problems involving velocity and other quantities that can be represented by vectors.</p>	<p>Precalculus and Advanced Topics M2 Lesson 17: Vectors in the Coordinate Plane</p> <p>Precalculus and Advanced Topics M2 Lesson 20: Vectors and Stone Bridges</p> <p>Precalculus and Advanced Topics M2 Lesson 23: Why Are Vectors Useful?</p>

Vector and Matrix Quantities

P.N.VM.B Understand the graphic representation of vectors and vector arithmetic.

Tennessee Academic Standards for Mathematics	Aligned Components of <i>Eureka Math</i>
<p>P.N.VM.B.4</p> <p>Add and subtract vectors.</p>	<p><i>This standard is fully addressed by the lessons aligned to its subsections.</i></p>
<p>P.N.VM.B.4a</p> <p>Add vectors end-to-end, component-wise, and by the parallelogram rule. Understand that the magnitude of a sum of two vectors is typically not the sum of the magnitudes.</p>	<p>Precalculus and Advanced Topics M2 Lesson 5: Coordinates of Points in Space</p> <p>Precalculus and Advanced Topics M2 Lesson 6: Linear Transformations as Matrices</p> <p>Precalculus and Advanced Topics M2 Lesson 17: Vectors in the Coordinate Plane</p> <p>Precalculus and Advanced Topics M2 Lesson 18: Vectors and Translation Maps</p> <p>Precalculus and Advanced Topics M2 Lesson 19: Directed Line Segments and Vectors</p> <p>Precalculus and Advanced Topics M2 Lesson 20: Vectors and Stone Bridges</p> <p>Precalculus and Advanced Topics M2 Lesson 23: Why Are Vectors Useful?</p> <p>Precalculus and Advanced Topics M2 Lesson 24: Why Are Vectors Useful?</p>
<p>P.N.VM.B.4b</p> <p>Given two vectors in magnitude and direction form, determine the magnitude and direction of their sum.</p>	<p>Precalculus and Advanced Topics M2 Lesson 20: Vectors and Stone Bridges</p> <p>Precalculus and Advanced Topics M2 Lesson 23: Why Are Vectors Useful?</p> <p>Precalculus and Advanced Topics M2 Lesson 24: Why Are Vectors Useful?</p>
<p>P.N.VM.B.4c</p> <p>Understand vector subtraction $\mathbf{v} - \mathbf{w}$ as $\mathbf{v} + (-\mathbf{w})$, where $-\mathbf{w}$ is the additive inverse of \mathbf{w}, with the same magnitude as \mathbf{w} and pointing in the opposite direction. Represent vector subtraction graphically by connecting the tips in the appropriate order, and perform vector subtraction component-wise.</p>	<p>Precalculus and Advanced Topics M2 Lesson 6: Linear Transformations as Matrices</p> <p>Precalculus and Advanced Topics M2 Lesson 17: Vectors in the Coordinate Plane</p> <p>Precalculus and Advanced Topics M2 Lesson 18: Vectors and Translation Maps</p> <p>Precalculus and Advanced Topics M2 Lesson 19: Directed Line Segments and Vectors</p> <p>Precalculus and Advanced Topics M2 Lesson 23: Why Are Vectors Useful?</p> <p>Precalculus and Advanced Topics M2 Lesson 24: Why Are Vectors Useful?</p>

**Tennessee Academic Standards
for Mathematics**

Aligned Components of *Eureka Math*

<p>P.N.VM.B.5 Multiply a vector by a scalar.</p>	<p><i>This standard is fully addressed by the lessons aligned to its subsections.</i></p>
<p>P.N.VM.B.5a Represent scalar multiplication graphically by scaling vectors and possibly reversing their direction; perform scalar multiplication component-wise (e.g., as $c(v_x, v_y) = (cv_x, cv_y)$).</p>	<p>Precalculus and Advanced Topics M2 Lesson 5: Coordinates of Points in Space Precalculus and Advanced Topics M2 Lesson 6: Linear Transformations as Matrices Precalculus and Advanced Topics M2 Lesson 17: Vectors in the Coordinate Plane Precalculus and Advanced Topics M2 Lesson 18: Vectors and Translation Maps Precalculus and Advanced Topics M2 Lesson 20: Vectors and Stone Bridges</p>
<p>P.N.VM.B.5b Compute the magnitude of a scalar multiple $c\mathbf{v}$ using $\ c\mathbf{v}\ = c \mathbf{v}$. Compute the direction of $c\mathbf{v}$ knowing that when $c \mathbf{v} \neq 0$, the direction of $c\mathbf{v}$ is either along \mathbf{v} (for $c > 0$) or against \mathbf{v} (for $c < 0$).</p>	<p>Precalculus and Advanced Topics M2 Lesson 5: Coordinates of Points in Space Precalculus and Advanced Topics M2 Lesson 6: Linear Transformations as Matrices Precalculus and Advanced Topics M2 Lesson 17: Vectors in the Coordinate Plane Precalculus and Advanced Topics M2 Lesson 18: Vectors and Translation Maps Precalculus and Advanced Topics M2 Lesson 20: Vectors and Stone Bridges</p>
<p>P.N.VM.B.6 Calculate and interpret the dot product of two vectors.</p>	<p><i>Supplemental material is necessary to address this standard.</i></p>

Vector and Matrix Quantities

P.N.VM.C Perform operations on matrices and use matrices in applications.

Tennessee Academic Standards for Mathematics

Aligned Components of *Eureka Math*

Tennessee Academic Standards for Mathematics	Aligned Components of <i>Eureka Math</i>
<p>P.N.VM.C.7</p> <p>Understand that, unlike multiplication of numbers, matrix multiplication for square matrices is not a commutative operation, but still satisfies the associative and distributive properties.</p>	<p>Precalculus and Advanced Topics M2 Lesson 10: Matrix Multiplication Is Not Commutative</p> <p>Precalculus and Advanced Topics M2 Lesson 12: Matrix Multiplication Is Distributive and Associative</p>
<p>P.N.VM.C.8</p> <p>Understand that the zero and identity matrices play a role in matrix addition and multiplication similar to the role of 0 and 1 in the real numbers. The determinant of a square matrix is nonzero if and only if the matrix has a multiplicative inverse.</p>	<p>Precalculus and Advanced Topics M1 Lesson 24: Matrix Notation Encompasses New Transformations!</p> <p>Precalculus and Advanced Topics M1 Lesson 25: Matrix Multiplication and Addition</p> <p>Precalculus and Advanced Topics M1 Lesson 26: Getting a Handle on New Transformations</p> <p>Precalculus and Advanced Topics M1 Lesson 27: Getting a Handle on New Transformations</p> <p>Precalculus and Advanced Topics M1 Lesson 28: When Can We Reverse a Transformation?</p> <p>Precalculus and Advanced Topics M1 Lesson 29: When Can We Reverse a Transformation?</p> <p>Precalculus and Advanced Topics M1 Lesson 30: When Can We Reverse a Transformation?</p> <p>Precalculus and Advanced Topics M2 Lesson 6: Linear Transformations as Matrices</p> <p>Precalculus and Advanced Topics M2 Lesson 13: Using Matrix Operations for Encryption</p> <p>Precalculus and Advanced Topics M2 Topic C: Systems of Linear Equations</p>

**Tennessee Academic Standards
for Mathematics**

Aligned Components of *Eureka Math*

<p>P.N.VM.C.9</p> <p>Multiply a vector (regarded as a matrix with one column) by a matrix of suitable dimensions to produce another vector. Work with matrices as transformations of vectors.</p>	<p>Precalculus and Advanced Topics M1 Lesson 21: The Hunt for Better Notation</p> <p>Precalculus and Advanced Topics M1 Lesson 22: Modeling Video Game Motion with Matrices</p> <p>Precalculus and Advanced Topics M1 Lesson 23: Modeling Video Game Motion with Matrices</p> <p>Precalculus and Advanced Topics M2 Lesson 4: Linear Transformations Review</p> <p>Precalculus and Advanced Topics M2 Lesson 7: Linear Transformations Applied to Cubes</p> <p>Precalculus and Advanced Topics M2 Lesson 11: Matrix Addition Is Commutative</p> <p>Precalculus and Advanced Topics M2 Lesson 18: Vectors and Translation Maps</p> <p>Precalculus and Advanced Topics M2 Lesson 21: Vectors and the Equation of a Line</p> <p>Precalculus and Advanced Topics M2 Lesson 22: Linear Transformations of Lines</p> <p>Precalculus and Advanced Topics M2 Lesson 24: Why Are Vectors Useful?</p> <p>Precalculus and Advanced Topics M2 Topic E: First-Person Video Games—Projection Matrices</p>
<p>P.N.VM.C.10</p> <p>Work with 2×2 matrices as transformations of the plane, and interpret the absolute value of the determinant in terms of area.</p>	<p>Precalculus and Advanced Topics M1 Lesson 21: The Hunt for Better Notation</p> <p>Precalculus and Advanced Topics M1 Lesson 22: Modeling Video Game Motion with Matrices</p> <p>Precalculus and Advanced Topics M1 Lesson 23: Modeling Video Game Motion with Matrices</p> <p>Precalculus and Advanced Topics M1 Lesson 26: Getting a Handle on New Transformations</p> <p>Precalculus and Advanced Topics M1 Lesson 27: Getting a Handle on New Transformations</p> <p>Precalculus and Advanced Topics M1 Lesson 28: When Can We Reverse a Transformation?</p> <p>Precalculus and Advanced Topics M1 Lesson 29: When Can We Reverse a Transformation?</p> <p>Precalculus and Advanced Topics M1 Lesson 30: When Can We Reverse a Transformation?</p> <p>Precalculus and Advanced Topics M2 Lesson 8: Composition of Linear Transformations</p>

Sequences and Series

P.A.S.A Understand and use sequences and series.

Tennessee Academic Standards for Mathematics	Aligned Components of <i>Eureka Math</i>
<p>P.A.S.A.1</p> <p>Demonstrate an understanding of sequences by representing them recursively and explicitly.</p>	<p>Algebra I M3 Lesson 2: Recursive Formulas for Sequences</p> <p>Algebra I M3 Lesson 3: Arithmetic and Geometric Sequences</p> <p>Algebra I M3 Lesson 4: Why Do Banks Pay YOU to Provide Their Services?</p> <p>Algebra II M3 Lesson 26: Percent Rate of Change</p>
<p>P.A.S.A.2</p> <p>Use sigma notation to represent a series; expand and collect expressions in both finite and infinite settings.</p>	<p>Algebra II M3 Lesson 29: The Mathematics Behind a Structured Savings Plan</p> <p>Algebra II M3 Lesson 31: Credit Cards</p>
<p>P.A.S.A.3</p> <p>Derive and use the formulas for the general term and summation of finite or infinite arithmetic and geometric series, if they exist.</p>	<p><i>Supplemental material is necessary to address this standard.</i></p>
<p>P.A.S.A.3a</p> <p>Determine whether a given arithmetic or geometric series converges or diverges.</p>	<p><i>Supplemental material is necessary to address this standard.</i></p>
<p>P.A.S.A.3b</p> <p>Find the sum of a given geometric series (both infinite and finite).</p>	<p>Algebra II M3 Topic E: Geometric Series and Finance</p> <p><i>Supplemental material is necessary to address finding the sum of a given infinite geometric series.</i></p>

**Tennessee Academic Standards
for Mathematics**

Aligned Components of *Eureka Math*

<p>P.A.S.A.3c Find the sum of a finite arithmetic series.</p>	<p>Algebra II M3 Lesson 29: The Mathematics Behind a Structured Savings Plan</p>
<p>P.A.S.A.4 Understand that series represent the approximation of a number when truncated; estimate truncation error in specific examples.</p>	<p><i>Supplemental material is necessary to address this standard.</i></p>
<p>P.A.S.A.5 Know and apply the Binomial Theorem for the expansion of $(x + y)^n$ in powers of x and y for a positive integer n, where x and y are any numbers, with coefficients determined, for example, by Pascal’s Triangle.</p>	<p>Precalculus and Advanced Topics M3 Lesson 4: The Binomial Theorem Precalculus and Advanced Topics M3 Lesson 5: The Binomial Theorem</p>

Reasoning with Equations and Inequalities

P.A.REI.A Solve systems of equations and nonlinear inequalities.

**Tennessee Academic Standards
for Mathematics**

Aligned Components of *Eureka Math*

<p>P.A.REI.A.1 Represent a system of linear equations as a single matrix equation in a vector variable.</p>	<p>Precalculus and Advanced Topics M2 Topic C: Systems of Linear Equations</p>
--	--

**Tennessee Academic Standards
for Mathematics**

Aligned Components of *Eureka Math*

<p>P.A.REI.A.2</p> <p>Find the inverse of a matrix if it exists and use it to solve systems of linear equations (using technology for matrices of dimension 3×3 or greater).</p>	<p>Precalculus and Advanced Topics M2 Topic C: Systems of Linear Equations</p>
<p>P.A.REI.A.3</p> <p>Solve rational and radical equations in one variable, and identify extraneous solutions when they exist.</p>	<p>Algebra II M1 Lesson 22: Equivalent Rational Expressions</p> <p>Algebra II M1 Lesson 23: Comparing Rational Expressions</p> <p>Algebra II M1 Lesson 26: Solving Rational Equations</p> <p>Algebra II M1 Lesson 27: Word Problems Leading to Rational Equations</p> <p>Algebra II M1 Lesson 28: A Focus on Square Roots</p> <p>Algebra II M1 Lesson 29: Solving Radical Equations</p>
<p>P.A.REI.A.4</p> <p>Solve nonlinear inequalities (quadratic, trigonometric, conic, exponential, logarithmic, and rational) by graphing (solutions in interval notation if one-variable), by hand and with appropriate technology.</p>	<p><i>Supplemental material is necessary to address this standard.</i></p>
<p>P.A.REI.A.5</p> <p>Solve systems of nonlinear inequalities by graphing.</p>	<p><i>Supplemental material is necessary to address this standard.</i></p>

Parametric Equations

P.A.PE.A Describe and use parametric equations.

Tennessee Academic Standards for Mathematics	Aligned Components of <i>Eureka Math</i>
<p>P.A.PE.A.1</p> <p>Graph curves parametrically (by hand and with appropriate technology).</p>	<p><i>Supplemental material is necessary to address this standard.</i></p>
<p>P.A.PE.A.2</p> <p>Eliminate parameters by rewriting parametric equations as a single equation.</p>	<p><i>Supplemental material is necessary to address this standard.</i></p>

Conic Sections

P.A.C.A Understand the properties of conic sections and model real-world phenomena.

Tennessee Academic Standards for Mathematics	Aligned Components of <i>Eureka Math</i>
<p>P.A.C.A.1</p> <p>Display all of the conic sections as portions of a cone.</p>	<p><i>Supplemental material is necessary to address this standard.</i></p>
<p>P.A.C.A.2</p> <p>Know and write the equation of a circle of given center and radius using the Pythagorean Theorem.</p>	<p>Geometry M5 Lesson 17: Writing the Equation for a Circle</p> <p>Geometry M5 Lesson 18: Recognizing Equations of Circles</p>

**Tennessee Academic Standards
for Mathematics**

Aligned Components of *Eureka Math*

<p>P.A.C.A.3</p> <p>Derive the equations of ellipses and hyperbolas given the foci, using the fact that the sum or difference of distances from the foci is constant.</p>	<p>Precalculus and Advanced Topics M3 Lesson 6: Curves in the Complex Plane</p> <p>Precalculus and Advanced Topics M3 Lesson 7: Curves from Geometry</p> <p>Precalculus and Advanced Topics M3 Lesson 8: Curves from Geometry</p>
<p>P.A.C.A.4</p> <p>From an equation in standard form, graph the appropriate conic section: ellipses, hyperbolas, circles, and parabolas. Demonstrate an understanding of the relationship between their standard algebraic form and the graphical characteristics.</p>	<p>Algebra II M1 Lesson 31: Systems of Equations</p> <p>Algebra II M1 Lesson 32: Graphing Systems of Equations</p> <p>Algebra II M1 Lesson 34: Are All Parabolas Congruent?</p> <p>Precalculus and Advanced Topics M3 Lesson 7: Curves from Geometry</p> <p>Precalculus and Advanced Topics M3 Lesson 8: Curves from Geometry</p>
