## Grade 7 | West Virginia College- and Career-Readiness Standards for Mathematics Correlation to *Eureka Math*<sup>®</sup>

### About *Eureka Math*

Created by Great Minds<sup>®</sup>, a mission-driven Public Benefit Corporation, *Eureka Math*<sup>®</sup> helps teachers deliver unparalleled math instruction that provides students with a deep understanding and fluency in math. Crafted by teachers and math scholars, the curriculum carefully sequences the mathematical progressions to maximize coherence from Prekindergarten through Precalculus—a principle tested and proven to be essential in students’ mastery of math.

Teachers and students using *Eureka Math* find the trademark “Aha!” moments in *Eureka Math* to be a source of joy and inspiration, lesson after lesson, year after year.

### Aligned

Great Minds offers detailed analyses that demonstrate how each grade of *Eureka Math* aligns with specific state standards. Access these free alignment studies at [greatminds.org/state-studies](https://greatminds.org/state-studies).

### Data

Schools and districts nationwide are experiencing student growth and impressive test scores after using *Eureka Math*. See their stories and data at [greatminds.org/data](https://greatminds.org/data).

### Full Suite of Resources

Great Minds offers the *Eureka Math* curriculum as PDF downloads for free, noncommercial use. Access the free PDFs at [greatminds.org/math/curriculum](https://greatminds.org/math/curriculum).

The teacher-writers who created the curriculum have also developed essential resources, available only from Great Minds, including the following:

- Printed material in English and Spanish
- Digital resources
- Professional development
- Classroom tools and manipulatives
- Teacher support materials
- Parent resources

| Mathematical Habits of Mind  | Aligned Components of <i>Eureka Math</i>   |
|--|--|
| <p><b>MHM.1</b><br/>Make sense of problems and persevere in solving them.</p>            | <p>Lessons in every module engage students in mathematical practices. These are designated in the Module Overview and labeled in lessons.</p> <p>For example:</p>  |
| <p><b>MHM.2</b><br/>Reason abstractly and quantitatively.</p>                            | <div style="border: 1px solid #ccc; padding: 5px; margin-bottom: 10px;"> <div style="display: flex; justify-content: space-between; align-items: center;"> <span>A STORY OF RATIOS</span> <span>Lesson 13</span> <span style="background-color: #333; color: white; padding: 2px 5px; border-radius: 3px;">7•3</span> </div> </div> <p>Questions leading to finding a solution:</p>  |
| <p><b>MHM.3</b><br/>Construct viable arguments and critique the reasoning of others.</p> | <ul style="list-style-type: none"> <li>▪ What is a solution set of an inequality?             <ul style="list-style-type: none"> <li>▫ A solution set contains more than one number that makes the inequality a true statement.</li> </ul> </li> <li>▪ Is <math>-3</math> a solution to our inequality in part (a)?             <ul style="list-style-type: none"> <li>▫ Yes. When the value of <math>-3</math> is substituted into the inequality, the resulting statement is true.</li> </ul> </li> <li>▪ Could <math>-4</math> be a solution to our inequality in part (a)?             <ul style="list-style-type: none"> <li>▫ Substituting <math>-4</math> does not result in a true statement because <math>-12</math> is equal to, but not greater than <math>-12</math>.</li> </ul> </li> </ul> |
| <p><b>MHM.4</b><br/>Model with mathematics.</p>  | <ul style="list-style-type: none"> <li>▪ We have found that <math>x = -3</math> is a solution to the inequality in part (a) where <math>x = -4</math> and <math>x = -5</math> are not. What is meant by the minimum value in this inequality? Explain.             <ul style="list-style-type: none"> <li>▫ The minimum value is the smallest value that makes the inequality true. <math>-3</math> is not the minimum value because there are rational numbers that are smaller than <math>-3</math> but greater than <math>-4</math>. For example, <math>-3\frac{1}{2}</math> is smaller than <math>-3</math> but still creates a true statement.</li> </ul> </li> </ul>   |
| <p><b>MHM.5</b><br/>Use appropriate tools strategically.</p>                             | <ul style="list-style-type: none"> <li>▪ How is solving an inequality similar to solving an equation? How is it different?             <ul style="list-style-type: none"> <li>▫ Solving an equation and an inequality are similar in the sequencing of steps taken to solve for the variable. The same if-then moves are used to solve for the variable.</li> <li>▫ They are different because in an equation, you get one solution, but in an inequality, there are an infinite number of solutions.</li> </ul> </li> </ul>   |
| <p><b>MHM.6</b><br/>Attend to precision.</p>   |  |
| <p><b>MHM.7</b><br/>Look for and make use of structure.</p>                              |  |
| <p><b>MHM.8</b><br/>Look for and express regularity in repeated reasoning.</p>           |  |

## Ratios and Proportional Relationships

Analyze proportional relationships and use them to solve real-world and mathematical problems.

### West Virginia College- and Career-Readiness Standards for Mathematics

### Aligned Components of *Eureka Math*

|   |  |
|---|--|
| <p><b>M.7.1</b></p> <p>Compute unit rates associated with ratios of fractions, including ratios of lengths, areas and other quantities measured in like or different units (e.g., if a person walks <math>\frac{1}{2}</math> mile in each <math>\frac{1}{4}</math> hour, compute the unit rate as the complex fraction <math>(\frac{1}{2})/(\frac{1}{4})</math> miles per hour, equivalently 2 miles per hour).</p> | <p>G7 M1 Topic B: Unit Rate and the Constant of Proportionality</p> <p>G7 M1 Lesson 11: Ratios of Fractions and Their Unit Rates</p> <p>G7 M1 Lesson 12: Ratios of Fractions and Their Unit Rates</p>  |

**Aligned Components of *Eureka Math***

|   |   |
|---|---|
| <p><b>M.7.5</b></p> <p>Apply and extend previous understandings of multiplication and division and of fractions to multiply and divide rational numbers.</p>  | <p>G7 M2 Topic B: Multiplication and Division of Integers and Rational Numbers</p>  |
| <p><b>M.7.5.a</b></p> <p>Understand that multiplication is extended from fractions to rational numbers by requiring that operations continue to satisfy the properties of operations, particularly the distributive property, leading to products such as <math>(-1)(-1) = 1</math> and the rules for multiplying signed numbers. Interpret products of rational numbers by describing real-world contexts.</p> | <p>G7 M2 Lesson 10: Understanding Multiplication of Integers</p> <p>G7 M2 Lesson 11: Develop Rules for Multiplying Signed Numbers</p> <p>G7 M2 Lesson 15: Multiplication and Division of Rational Numbers</p> |
| <p><b>M.7.5.b</b></p> <p>Understand that integers can be divided, provided that the divisor is not zero, and every quotient of integers (with non-zero divisor) is a rational number. If <math>p</math> and <math>q</math> are integers, then <math>-\left(\frac{p}{q}\right) = \frac{-p}{q} = \frac{p}{-q}</math>. Interpret quotients of rational numbers by describing real-world contexts.</p>              | <p>G7 M2 Lesson 12: Division of Integers</p> <p>G7 M2 Lesson 15: Multiplication and Division of Rational Numbers</p>  |

**West Virginia College- and Career-Readiness Standards for Mathematics**

**Aligned Components of *Eureka Math***

|  |   |
|--|---|
| <p><b>M.7.5.c</b></p> <p>Apply properties of operations as strategies to multiply and divide rational numbers.</p>   | <p>G7 M2 Lesson 16: Applying the Properties of Operations to Multiply and Divide Rational Numbers</p>   |
| <p><b>M.7.5.d</b></p> <p>Convert a rational number to a decimal using long division; know that the decimal form of a rational number terminates in 0s or eventually repeats.</p> | <p>G7 M2 Lesson 13: Converting Between Fractions and Decimals Using Equivalent Fractions</p> <p>G7 M2 Lesson 14: Converting Rational Numbers to Decimals Using Long Division</p>  |
| <p><b>M.7.6</b></p> <p>Solve real-world and mathematical problems involving the four operations with rational numbers.</p>   | <p>G7 M2 Lesson 18: Writing, Evaluating, and Finding Equivalent Expressions with Rational Numbers</p> <p>G7 M2 Lesson 19: Writing, Evaluating, and Finding Equivalent Expressions with Rational Numbers</p> <p>G7 M2 Lesson 20: Investments—Performing Operations with Rational Numbers</p> <p>G7 M2 Lesson 21: If-Then Moves with Integer Number Cards</p> |

## Expressions and Equations

Use properties of operations to generate equivalent expressions.

### West Virginia College- and Career-Readiness Standards for Mathematics

### Aligned Components of *Eureka Math*

|  |   |
|--|---|
| <p><b>M.7.7</b></p> <p>Apply properties of operations as strategies to add, subtract, factor and expand linear expressions with rational coefficients.</p>   | <p>G7 M3 Topic A: Use Properties of Operations to Generate Equivalent Expressions</p>   |
| <p><b>M.7.8</b></p> <p>Understand that rewriting an expression in different forms in a problem context can shed light on the problem and how the quantities in it are related (e.g., <math>a + 0.05a = 1.05a</math> means that “increase by 5%” is the same as “multiply by 1.05.”).</p> | <p>G7 M2 Lesson 18: Writing, Evaluating, and Finding Equivalent Expressions with Rational Numbers</p> <p>G7 M2 Lesson 19: Writing, Evaluating, and Finding Equivalent Expressions with Rational Numbers</p> <p>G7 M2 Lesson 21: If-Then Moves with Integer Number Cards</p> <p>G7 M3 Lesson 3: Writing Products as Sums and Sums as Products</p> <p>G7 M3 Lesson 4: Writing Products as Sums and Sums as Products</p> |

## Expressions and Equations

Solve real-life and mathematical problems using numerical and algebraic expressions and equations.

### West Virginia College- and Career-Readiness Standards for Mathematics

### Aligned Components of *Eureka Math*

| West Virginia College- and Career-Readiness Standards for Mathematics  | Aligned Components of <i>Eureka Math</i>  |
|--|---|
| <p><b>M.7.9</b></p> <p>Solve multi-step real-life and mathematical problems posed with positive and negative rational numbers in any form (whole numbers, fractions, and decimals), using tools strategically. Apply properties of operations to calculate with numbers in any form; convert between forms as appropriate; and assess the reasonableness of answers using mental computation and estimation strategies (e.g., if a woman making \$25 an hour gets a 10% raise, she will make an additional <math>\frac{1}{10}</math> of her salary an hour, or \$2.50, for a new salary of \$27.50; if you want to place a towel bar <math>9\frac{3}{4}</math> inches long in the center of a door that is <math>27\frac{1}{2}</math> inches wide, you will need to place the bar about 9 inches from each edge; this estimate can be used as a check on the exact computation).</p> | <p>G7 M3 Lesson 7: Understanding Equations</p> <p>G7 M3 Lesson 8: Using If-Then Moves in Solving Equations</p> <p>G7 M3 Lesson 9: Using If-Then Moves in Solving Equations</p> <p>G7 M3 Lesson 10: Angle Problems and Solving Equations</p> <p>G7 M3 Lesson 11: Angle Problems and Solving Equations</p> <p>G7 M3 Lesson 13: Inequalities</p> <p>G7 M3 Lesson 14: Solving Inequalities</p> <p>G7 M3 Lesson 15: Graphing Solutions to Inequalities</p> <p>G7 M4 Lesson 7: Markup and Markdown Problems</p> <p>G7 M4 Lesson 8: Percent Error Problems</p> <p>G7 M4 Lesson 9: Problem Solving When the Percent Changes</p> <p>G7 M4 Topic D: Population, Mixture, and Counting Problems Involving Percents</p> |

**M.7.22**

Use measures of center and measures of variability for numerical data from random samples to draw informal comparative inferences about two populations (e.g., decide whether the words in a chapter of a seventh-grade science book are generally longer than the words in a chapter of a fourth-grade science book).

G7 M5 Topic D: Comparing Populations

**Statistics and Probability**

**Investigate chance processes and develop, use, and evaluate probability models.**

**West Virginia College- and Career-Readiness Standards for Mathematics**

**Aligned Components of *Eureka Math***

**M.7.23**

Understand that the probability of a chance event is a number between 0 and 1 that expresses the likelihood of the event occurring. Larger numbers indicate greater likelihood. A probability near 0 indicates an unlikely event, a probability around  $\frac{1}{2}$  indicates an event that is neither unlikely nor likely and a probability near 1 indicates a likely event.
