About *Eureka Math*

Created by Great Minds[®], a mission-driven Public Benefit Corporation, *Eureka Math*[®] helps teachers deliver unparalleled math instruction that provides students with a deep understanding and fluency in math. Crafted by teachers and math scholars, the curriculum carefully sequences the mathematical progressions to maximize coherence from Prekindergarten through Precalculus—a principle tested and proven to be essential in students’ mastery of math.

Teachers and students using *Eureka Math* find the trademark “Aha!” moments in *Eureka Math* to be a source of joy and inspiration, lesson after lesson, year after year.

Aligned

Great Minds offers detailed analyses that demonstrate how each grade of *Eureka Math* aligns with specific state standards. Access these free alignment studies at greatminds.org/state-studies.

Data

Schools and districts nationwide are experiencing student growth and impressive test scores after using *Eureka Math*. See their stories and data at greatminds.org/data.

Full Suite of Resources

Great Minds offers the *Eureka Math* curriculum as PDF downloads for free, noncommercial use. Access the free PDFs at greatminds.org/math/curriculum.

The teacher-writers who created the curriculum have also developed essential resources, available only from Great Minds, including the following:

- Printed material in English and Spanish
- Digital resources
- Professional development
- Classroom tools and manipulatives
- Teacher support materials
- Parent resources

Mathematical Habits of Mind	Aligned Components of <i>Eureka Math</i>
<p>MHM.1 Make sense of problems and persevere in solving them.</p>	<p>Lessons in every module engage students in mathematical practices. These are designated in the Module Overview and labeled in lessons.</p> <p>For example:</p>
<p>MHM.2 Reason abstractly and quantitatively.</p>	<div style="border: 1px solid #ccc; padding: 10px; margin-bottom: 10px;"> <div style="display: flex; justify-content: space-between; align-items: center;"> A STORY OF FUNCTIONS Lesson 8 M4 </div> <div style="text-align: right; font-size: 0.8em; margin-top: 5px;">ALGEBRA I</div> </div>
<p>MHM.3 Construct viable arguments and critique the reasoning of others.</p>	<p>Problem Set Sample Solutions</p>
<p>MHM.4 Model with mathematics.</p>	<div style="border: 1px solid #ccc; padding: 10px; margin-bottom: 10px;"> <div style="display: flex; align-items: center; margin-bottom: 10px;"> <div style="background-color: #0070c0; color: white; padding: 2px 5px; margin-right: 5px;">MP.3</div> <div style="border-left: 1px solid #ccc; border-right: 1px solid #ccc; padding: 0 10px;"> <ol style="list-style-type: none"> 1. Khaya stated that every y-value of the graph of a quadratic function has two different x-values. Do you agree or disagree with Khaya? Explain your answer. <i>The graph of a quadratic function has two different x-values for each y-value except at the vertex where there is only one.</i> 2. Is it possible for the graphs of two <i>different</i> quadratic functions to each have $x = -3$ as its line of symmetry and both have a maximum at $y = 5$? Explain and support your answer with a sketch of the graphs. <i>Students should sketch two graphs with vertex at $(-3, 5)$ and different x-intercepts.</i> </div> </div> </div>
<p>MHM.5 Use appropriate tools strategically.</p>	
<p>MHM.6 Attend to precision.</p>	
<p>MHM.7 Look for and make use of structure.</p>	
<p>MHM.8 Look for and express regularity in repeated reasoning.</p>	

Expressions and Equations

Interpret the structure of expressions and equations in terms of the context they model.

West Virginia College- and Career-Readiness Standards for Mathematics

Aligned Components of *Eureka Math*

<p>M.A1HS.1</p> <p>Interpret linear, exponential, and quadratic expressions that represent a quantity in terms of its context.</p>	<p>Algebra I M1 Lesson 26: Recursive Challenge Problem—The Double and Add 5 Game</p> <p>Algebra I M1 Lesson 27: Recursive Challenge Problem—The Double and Add 5 Game</p> <p>Algebra I M3 Lesson 4: Why Do Banks Pay YOU to Provide Their Services?</p> <p>Algebra I M3 Lesson 5: The Power of Exponential Growth</p> <p>Algebra I M3 Lesson 6: Exponential Growth—U.S. Population and World Population</p> <p>Algebra I M3 Lesson 7: Exponential Decay</p> <p>Algebra I M4 Lesson 1: Multiplying and Factoring Polynomial Expressions</p> <p>Algebra I M4 Lesson 2: Multiplying and Factoring Polynomial Expressions</p> <p>Algebra I M4 Lesson 3: Advanced Factoring Strategies for Quadratic Expressions</p> <p>Algebra I M4 Lesson 4: Advanced Factoring Strategies for Quadratic Expressions</p> <p>Algebra I M4 Lesson 6: Solving Basic One-Variable Quadratic Equations</p> <p>Algebra I M4 Lesson 12: Completing the Square</p> <p>Algebra I M4 Lesson 17: Graphing Quadratic Functions from the Standard Form, $f(x) = ax^2 + bx + c$</p>

Expressions and Equations

Extend the properties of exponents to rational exponents.

West Virginia College- and Career-Readiness Standards for Mathematics

Aligned Components of *Eureka Math*

<p>M.A1HS.3</p> <p>Explain the connections between expressions with rational exponents and expressions with radicals using properties of exponents. Extend from application of properties of exponents for expressions with integer exponents.</p>	<p>Algebra II M3 Lesson 1: Integer Exponents</p> <p>Algebra II M3 Lesson 3: Rational Exponents</p> <p>Algebra II M3 Lesson 4: Properties of Exponents and Radicals</p>
<p>M.A1HS.4</p> <p>Rewrite expressions involving radicals, including simplifying, and rational exponents using the properties of exponents.</p>	<p>Algebra II M3 Lesson 1: Integer Exponents</p> <p>Algebra II M3 Lesson 3: Rational Exponents</p> <p>Algebra II M3 Lesson 4: Properties of Exponents and Radicals</p>

Expressions and Equations

Write expressions in equivalent forms to solve problems.

West Virginia College- and Career-Readiness Standards for Mathematics

Aligned Components of *Eureka Math*

<p>M.A1HS.5</p> <p>Choose and produce an equivalent form of linear, exponential, and quadratic expressions to reveal and explain properties of the quantity represented by the expression through connections to a graphical representation of the function.</p>	<p>G8 M4 Lesson 21: Some Facts About Graphs of Linear Equations in Two Variables</p> <p>G8 M5 Lesson 6: Graphs of Linear Functions and Rate of Change</p> <p>Algebra I M3 Lesson 23: Newton’s Law of Cooling</p> <p>Algebra I M4 Lesson 9: Graphing Quadratic Functions from Factored Form, $f(x) = a(x - m)(x - n)$</p> <p>Algebra I M4 Lesson 11: Completing the Square</p> <p>Algebra I M4 Lesson 12: Completing the Square</p> <p>Algebra I M4 Lesson 15: Using the Quadratic Formula</p> <p>Algebra I M4 Lesson 16: Graphing Quadratic Equations from the Vertex Form, $y = a(x - h)^2 + k$</p> <p>Algebra I M4 Lesson 17: Graphing Quadratic Functions from the Standard Form, $f(x) = ax^2 + bx + c$</p>
<p>M.A1HS.5.a</p> <p>Factor a quadratic expression to reveal the zeros of the function it defines.</p>	<p>Algebra I M4 Lesson 9: Graphing Quadratic Functions from Factored Form, $f(x) = a(x - m)(x - n)$</p> <p>Algebra I M4 Lesson 15: Using the Quadratic Formula</p>
<p>M.A1HS.5.b</p> <p>Complete the square in a quadratic expression, when $a = 1$ only, to reveal the maximum or minimum value of the function it defines.</p>	<p>Algebra I M4 Lesson 11: Completing the Square</p> <p>Algebra I M4 Lesson 12: Completing the Square</p> <p>Algebra I M4 Lesson 17: Graphing Quadratic Functions from the Standard Form, $f(x) = ax^2 + bx + c$</p>

West Virginia College- and Career-Readiness Standards for Mathematics

Aligned Components of *Eureka Math*

<p>M.A1HS.5.c</p> <p>Use the properties of exponents to transform expressions in exponential functions. For example, the expression $1.15t$ can be rewritten as $(1.15^{\frac{1}{12}})^{12t} \approx 1.012^{12t}$ to reveal the approximate equivalent monthly interest rate if the annual rate is 15%.</p>	<p>Algebra I M3 Lesson 23: Newton’s Law of Cooling</p>
--	--

Expressions and Equations

Perform arithmetic operations on polynomials.

West Virginia College- and Career-Readiness Standards for Mathematics

Aligned Components of *Eureka Math*

<p>M.A1HS.6</p> <p>Recognize that polynomials form a system analogous to the integers, namely, they are closed under the operations of addition, subtraction, and multiplication; add, subtract, and multiply polynomials. Focus on linear or quadratic terms.</p>	<p>Algebra I M1 Lesson 8: Adding and Subtracting Polynomials</p> <p>Algebra I M1 Lesson 9: Multiplying Polynomials</p> <p>Algebra I M4 Lesson 1: Multiplying and Factoring Polynomial Expressions</p> <p>Algebra I M4 Lesson 2: Multiplying and Factoring Polynomial Expressions</p> <p>Algebra I M4 Lesson 3: Advanced Factoring Strategies for Quadratic Expressions</p> <p>Algebra I M4 Lesson 4: Advanced Factoring Strategies for Quadratic Expressions</p>
---	--

Expressions and Equations

Create equations that describe numbers or relationships.

West Virginia College- and Career-Readiness Standards for Mathematics

Aligned Components of *Eureka Math*

<p>M.A1HS.7</p> <p>Create equations and inequalities in one variable, representing linear and exponential relationships, and use them to solve problems. In the case of exponential equations, limit to situations with integer inputs.</p>	<p>Algebra I M1 Lesson 18: Equations Involving a Variable Expression in the Denominator</p> <p>Algebra I M1 Lesson 25: Solving Problems in Two Ways—Rates and Algebra</p> <p>Algebra I M1 Lesson 26: Recursive Challenge Problem—The Double and Add 5 Game</p> <p>Algebra I M1 Lesson 27: Recursive Challenge Problem—The Double and Add 5 Game</p> <p>Algebra I M4 Lesson 6: Solving Basic One-Variable Quadratic Equations</p> <p>Algebra I M4 Lesson 7: Creating and Solving Quadratic Equations in One Variable</p> <p>Algebra I M5 Lesson 6: Modeling a Context from Data</p> <p>Algebra I M5 Lesson 9: Modeling a Context from a Verbal Description</p> <p>Algebra II M3 Lesson 7: Bacteria and Exponential Growth</p> <p>Algebra II M3 Lesson 26: Percent Rate of Change</p> <p>Algebra II M3 Lesson 27: Modeling with Exponential Functions</p>
