
Mathematics I | Montana Content Standards for Mathematics Correlation to *Eureka Math*²®

When the original *Eureka Math*[®] curriculum was released, it quickly became the most widely used K–5 mathematics curriculum in the country. Now, the Great Minds[®] teacher–writers have created *Eureka Math*²®, a groundbreaking new curriculum that helps teachers deliver exponentially better math instruction while still providing students with the same deep understanding of and fluency in math. *Eureka Math*² carefully sequences mathematical content to maximize vertical alignment—a principle tested and proven to be essential in students’ mastery of math—from kindergarten through high school.

While this innovative new curriculum includes all the trademark *Eureka Math* aha moments that have been delighting students and teachers for years, it also boasts these exciting new features:

Teachability

*Eureka Math*² employs streamlined materials that allow teachers to plan more efficiently and focus their energy on delivering high-quality instruction that meets the individual needs of their students. Differentiation suggestions, slide decks, digital interactives, and multiple forms of assessment are just a few of the resources built right into the teacher materials.

Accessibility

*Eureka Math*² incorporates Universal Design for Learning principles so all learners can access the mathematics and take on challenging math concepts. Student supports are built into the instructional design and are clearly identified in the *Teach* book. Further, the curriculum carries a focus on readability. By eliminating unnecessary words and using simple, clear sentences, the *Eureka Math*² teacher–writers have created one of the most readable mathematics curricula on the market. The curriculum’s readability and accessibility help all students see themselves as mathematical thinkers and doers who are fully capable of owning their mathematics learning.

Digital Engagement

The digital elements of *Eureka Math*² add to students’ engagement with the math. The curriculum provides teachers with digital slides for each lesson. In addition, each grade level includes wordless videos that spark students’ interest and curiosity. Students at all levels work through mathematical explorations that help lead to their own mathematical discoveries. Digital lessons and videos provide opportunities for students to wonder, explore, and make sense of mathematics, which contributes to the development of a strong, positive mathematical identity.

| Standards for Mathematical Practice | Aligned Components of <i>Eureka Math</i> ² |
|---|---|
| <p>MP.1 Make sense of problems and persevere in solving them.</p> | <p>Lessons in every module engage students in mathematical practices. These are indicated in margin notes included with every lesson.</p> |
| <p>MP.2 Reason abstractly and quantitatively.</p> | <p>Lessons in every module engage students in mathematical practices. These are indicated in margin notes included with every lesson.</p> |
| <p>MP.3 Construct viable arguments and critique the reasoning of others.</p> | <p>Lessons in every module engage students in mathematical practices. These are indicated in margin notes included with every lesson.</p> |
| <p>MP.4 Model with mathematics.</p> | <p>Lessons in every module engage students in mathematical practices. These are indicated in margin notes included with every lesson.</p> |
| <p>MP.5 Use appropriate tools strategically.</p> | <p>Lessons in every module engage students in mathematical practices. These are indicated in margin notes included with every lesson.</p> |
| <p>MP.6 Attend to precision.</p> | <p>Lessons in every module engage students in mathematical practices. These are indicated in margin notes included with every lesson.</p> |
| <p>MP.7 Look for and make use of structure.</p> | <p>Lessons in every module engage students in mathematical practices. These are indicated in margin notes included with every lesson.</p> |
| <p>MP.8 Look for and express regularity in repeated reasoning.</p> | <p>Lessons in every module engage students in mathematical practices. These are indicated in margin notes included with every lesson.</p> |

Quantities

Reason quantitatively and use units to solve problems.

| Montana Content Standards for Mathematics | Aligned Components of <i>Eureka Math</i> ² |
|---|--|
| <p>N-Q.1</p> <p>Use units as a way to understand problems from a variety of contexts (e.g., science, history, and culture), including those of Montana American Indians, and to guide the solution of multi-step problems; choose and interpret units consistently in formulas; choose and interpret the scale and the origin in graphs and data displays.</p> | <p>Math 1 M1 Lesson 1: A Powerful Trio</p> <p>Math 1 M3 Lesson 14: Comparing Models for Situations</p> <p>Math 1 M6 Lesson 9: Solar System Models</p> <p>Math 1 M6 Lesson 10: Designing a Fundraiser</p> <p>Math 1 M6 Lesson 11: A Vanishing Sea</p> <p><i>Supplemental material is necessary to address a variety of contexts, including those of Montana American Indians.</i></p> |
| <p>N-Q.2</p> <p>Define appropriate quantities for the purpose of descriptive modeling.</p> | <p>Math 1 M1 Lesson 1: A Powerful Trio</p> <p>Math 1 M3 Lesson 14: Comparing Models for Situations</p> <p>Math 1 M6 Lesson 3: Analyzing Paint Splatters</p> <p>Math 1 M6 Lesson 9: Solar System Models</p> <p>Math 1 M6 Lesson 10: Designing a Fundraiser</p> |
| <p>N-Q.3</p> <p>Choose a level of accuracy appropriate to limitations on measurement when reporting quantities.</p> | <p>Math 1 M6 Lesson 9: Solar System Models</p> <p>Math 1 M6 Lesson 11: A Vanishing Sea</p> |

Seeing Structure in Expressions

Interpret the structure of expressions.

| Montana Content Standards for Mathematics | Aligned Components of <i>Eureka Math</i> ² |
|--|--|
| <p>A-SSE.1</p> <p>Interpret expressions that represent a quantity in terms of its context.</p> | <p><i>This standard is fully addressed by the lessons aligned to its subsections.</i></p> |
| <p>A-SSE.1.a</p> <p>Interpret parts of an expression, such as terms, factors, and coefficients.</p> | <p>Math 1 M1 Lesson 4: Interpreting Linear Expressions</p> |
| <p>A-SSE.1.b</p> <p>Interpret complicated expressions by viewing one or more of their parts as a single entity.</p> | <p>Math 1 M5 Lesson 7: Exponential Functions</p> <p>Math 1 M5 Lesson 14: Exponential Growth</p> <p>Math 1 M5 Lesson 15: Exponential Decay</p> <p>Math 1 M5 Lesson 16: Modeling Populations</p> <p>Math 1 M5 Lesson 22: Modeling the Temperature of Objects Cooling Over Time</p> |

Creating Equations

Create equations that describe numbers or relationships.

| Montana Content Standards for Mathematics | Aligned Components of <i>Eureka Math</i> ² |
|--|--|
| <p>A-CED.1</p> <p>Create equations and inequalities in one variable and use them to solve problems from a variety of contexts (e.g., science, history, and culture), including those of Montana American Indians.</p> | <p>Math 1 M1 Lesson 5: Printing Presses</p> <p>Math 1 M1 Lesson 9: Writing and Solving Equations in One Variable</p> <p>Math 1 M1 Lesson 11: Solving Linear Inequalities in One Variable</p> <p>Math 1 M1 Lesson 16: Applying Absolute Value</p> <p><i>Supplemental material is necessary to address a variety of contexts, including those of Montana American Indians.</i></p> |

for Mathematics**

Aligned Components of *Eureka Math*²

| | |
|---|--|
| <p>A-CED.2</p> <p>Create equations in two or more variables to represent relationships between quantities; graph equations on coordinate axes with labels and scales.</p> | <p>Math 1 M2 Lesson 1: Solution Sets of Linear Equations in Two Variables</p> <p>Math 1 M2 Lesson 2: Graphing Linear Equations in Two Variables</p> <p>Math 1 M2 Lesson 3: Creating Linear Equations in Two Variables</p> <p>Math 1 M2 Lesson 4: Proving Conditional Statements</p> <p>Math 1 M2 Lesson 5: Proving Biconditional Statements</p> <p>Math 1 M2 Lesson 8: Low-Flow Showerhead</p> <p>Math 1 M2 Lesson 12: Applications of Systems of Equations</p> <p>Math 1 M4 Lesson 5: Proving the Perpendicular Criterion</p> |
| <p>A-CED.3</p> <p>Represent constraints by equations or inequalities, and by systems of equations and/or inequalities, and interpret solutions as viable or nonviable options in a modeling context.</p> | <p>Math 1 M1 Lesson 9: Writing and Solving Equations in One Variable</p> <p>Math 1 M1 Lesson 12: Solution Sets of Compound Statements</p> <p>Math 1 M1 Lesson 13: Solving and Graphing Compound Inequalities</p> <p>Math 1 M1 Lesson 16: Applying Absolute Value</p> <p>Math 1 M2 Lesson 1: Solution Sets of Linear Equations in Two Variables</p> <p>Math 1 M2 Lesson 15: Applications of Linear Inequalities</p> <p>Math 1 M2 Lesson 18: Applications of Systems of Linear Inequalities</p> <p>Math 1 M6 Lesson 10: Designing a Fundraiser</p> |
| <p>A-CED.4</p> <p>Rearrange formulas to highlight a quantity of interest using the same reasoning as in solving equations.</p> | <p>Math 1 M1 Lesson 10: Rearranging Formulas</p> |

Reasoning with Equations and Inequalities

Understand solving equations as a process of reasoning and explain the reasoning.

| Montana Content Standards for Mathematics | Aligned Components of <i>Eureka Math</i> ² |
|--|--|
| <p>A-REI.1</p> <p>Explain each step in solving a simple equation as following from the equality of numbers asserted at the previous step, starting from the assumption that the original equation has a solution. Construct a viable argument to justify a solution method.</p> | <p>Math 1 M1 Lesson 3: The Commutative, Associative, and Distributive Properties</p> <p>Math 1 M1 Lesson 7: Solving Linear Equations in One Variable</p> <p>Math 1 M1 Lesson 8: Some Potential Dangers When Solving Equations</p> <p>Math 1 M1 Lesson 9: Writing and Solving Equations in One Variable</p> |

Reasoning with Equations and Inequalities

Solve equations and inequalities in one variable.

| Montana Content Standards for Mathematics | Aligned Components of <i>Eureka Math</i> ² |
|---|--|
| <p>A-REI.3</p> <p>Solve linear equations and inequalities in one variable, including equations with coefficients represented by letters.</p> | <p>Math 1 M1 Lesson 5: Printing Presses</p> <p>Math 1 M1 Lesson 6: Solution Sets of Equations and Inequalities in One Variable</p> <p>Math 1 M1 Lesson 7: Solving Linear Equations in One Variable</p> <p>Math 1 M1 Lesson 8: Some Potential Dangers When Solving Equations</p> <p>Math 1 M1 Lesson 9: Writing and Solving Equations in One Variable</p> <p>Math 1 M1 Lesson 11: Solving Linear Inequalities in One Variable</p> <p>Math 1 M1 Lesson 13: Solving and Graphing Compound Inequalities</p> <p>Math 1 M1 Lesson 14: Solving Absolute Value Equations</p> <p>Math 1 M1 Lesson 15: Solving Absolute Value Inequalities</p> |

Reasoning with Equations and Inequalities

Solve systems of equations.

| Montana Content Standards for Mathematics | Aligned Components of <i>Eureka Math</i> ² |
|---|---|
| A-REI.5 Prove that, given a system of two equations in two variables, replacing one equation by the sum of that equation and a multiple of the other produces a system with the same solutions. | Math 1 M2 Lesson 10: A New Way to Solve Systems |
| A-REI.6 Solve systems of linear equations exactly and approximately (e.g., with graphs), focusing on pairs of linear equations in two variables. | Math 1 M2 Topic B: Systems of Linear Equations in Two Variables |

Reasoning with Equations and Inequalities

Represent and solve equations and inequalities graphically.

| Montana Content Standards for Mathematics | Aligned Components of <i>Eureka Math</i> ² |
|--|--|
| A-REI.10 Understand that the graph of an equation in two variables is the set of all its solutions plotted in the coordinate plane, often forming a curve (which could be a line). | Math 1 M2 Lesson 1: Solution Sets of Linear Equations in Two Variables Math 1 M2 Lesson 2: Graphing Linear Equations in Two Variables |

**Montana Content Standards
for Mathematics**

Aligned Components of *Eureka Math*²

| | |
|--|--|
| <p>A-REI.11</p> <p>Explain why the x-coordinates of the points where the graphs of the equations $y = f(x)$ and $y = g(x)$ intersect are the solutions of the equation $f(x) = g(x)$; find the solutions approximately, e.g., using technology to graph the functions, make tables of values, or find successive approximations. Include cases where $f(x)$ and/or $g(x)$ are linear, polynomial, rational, absolute value, exponential, and logarithmic functions.</p> | <p>Math 1 M3 Lesson 10: Using Graphs to Solve Equations</p> <p>Math 1 M5 Lesson 11: Solving Equations Containing Exponential Expressions</p> <p>Math 1 M5 Lesson 19: Comparing Growth of Functions</p> <p><i>Supplemental material is necessary to address polynomial, rational, and logarithmic functions for this standard.</i></p> |
| <p>A-REI.12</p> <p>Graph the solutions to a linear inequality in two variables as a half-plane (excluding the boundary in the case of a strict inequality), and graph the solution set to a system of linear inequalities in two variables as the intersection of the corresponding half-planes.</p> | <p>Math 1 M2 Lesson 13: Solution Sets of Linear Inequalities in Two Variables</p> <p>Math 1 M2 Lesson 14: Graphing Linear Inequalities in Two Variables</p> <p>Math 1 M2 Lesson 16: Solution Sets of Systems of Linear Inequalities</p> <p>Math 1 M2 Lesson 17: Graphing Solution Sets of Systems of Linear Inequalities</p> <p>Math 1 M2 Lesson 18: Applications of Systems of Linear Inequalities</p> <p>Math 1 M6 Lesson 10: Designing a Fundraiser</p> |

Interpreting Functions

Understand the concept of a function and use function notation.

| Montana Content Standards for Mathematics | Aligned Components of <i>Eureka Math</i> ² |
|--|---|
| <p>F-IF.1</p> <p>Understand that a function from one set (called the domain) to another set (called the range) assigns to each element of the domain exactly one element of the range. If f is a function and x is an element of its domain, then $f(x)$ denotes the output of f corresponding to the input x. The graph of f is the graph of the equation $y = f(x)$.</p> | <p>Math 1 M3 Topic A: Functions and Their Graphs</p> |
| <p>F-IF.2</p> <p>Use function notation, evaluate functions for inputs in their domains, and interpret statements that use function notation in terms of a context.</p> | <p>Math 1 M3 Lesson 2: Interpreting and Using Function Notation</p> <p>Math 1 M3 Lesson 3: Representing, Naming, and Evaluating Functions</p> <p>Math 1 M3 Lesson 7: Representations of Functions</p> <p>Math 1 M5 Lesson 1: Exploring Patterns</p> <p>Math 1 M5 Lesson 2: The Recursive Challenge</p> <p>Math 1 M5 Lesson 3: Recursive Formulas for Sequences</p> <p>Math 1 M5 Lesson 4: Explicit Formulas for Sequences</p> |
| <p>F-IF.3</p> <p>Recognize that sequences are functions, sometimes defined recursively, whose domain is a subset of the integers.</p> | <p>Math 1 M5 Topic A: Arithmetic and Geometric Sequences</p> |

Interpreting Functions

Interpret functions that arise in applications in terms of the context.

| Montana Content Standards for Mathematics | Aligned Components of <i>Eureka Math</i> ² |
|--|--|
| <p>F-IF.4</p> <p>For a function that models a relationship between two quantities, interpret key features of graphs and tables in terms of the quantities, and sketch graphs showing key features given a verbal description of the relationship.</p> | <p>Math 1 M3 Lesson 8: Exploring Key Features of a Function and Its Graph</p> <p>Math 1 M3 Lesson 9: Identifying Key Features of a Function and Its Graph</p> <p>Math 1 M3 Lesson 11: Comparing Functions</p> <p>Math 1 M3 Lesson 12: Sketching Graphs of Functions from Verbal Descriptions</p> <p>Math 1 M3 Lesson 13: Modeling Elevation as a Function of Time</p> <p>Math 1 M3 Lesson 15: Mars Curiosity Rover</p> |
| <p>F-IF.5</p> <p>Relate the domain of a function to its graph and, where applicable, to the quantitative relationship it describes.</p> | <p>Math 1 M3 Lesson 4: The Graph of a Function</p> <p>Math 1 M3 Lesson 13: Modeling Elevation as a Function of Time</p> |
| <p>F-IF.6</p> <p>Calculate and interpret the average rate of change of a function (presented symbolically or as a table) over a specified interval. Estimate the rate of change from a graph.</p> | <p>Math 1 M5 Lesson 17: Average Rate of Change</p> <p>Math 1 M5 Lesson 18: Analyzing Exponential Growth</p> <p>Math 1 M5 Lesson 19: Comparing Growth of Functions</p> <p>Math 1 M5 Lesson 23: Modeling an Invasive Species Population</p> |

Interpreting Functions

Analyze functions using different representations.

| Montana Content Standards for Mathematics | Aligned Components of <i>Eureka Math</i> ² |
|--|--|
| <p>F-IF.7</p> <p>Graph functions expressed symbolically and show key features of the graph, by hand in simple cases and using technology for more complicated cases.</p> | <p><i>This standard is addressed by the lessons aligned to its subsections.</i></p> |
| <p>F-IF.7.a</p> <p>Graph linear and quadratic functions and show intercepts, maxima, and minima.</p> | <p>Math 1 M3 Lesson 5: The Graph of the Equation $y = f(x)$</p> <p>Math 1 M3 Lesson 6: Using Pseudocode to Compare Graphs of Functions and Graphs of Equations</p> <p>Math 1 M3 Lesson 7: Representations of Functions</p> <p><i>Supplemental material is necessary to address quadratic functions for this standard.</i></p> |
| <p>F-IF.7.e</p> <p>Graph exponential and logarithmic functions, showing intercepts and end behavior, and trigonometric functions, showing period, midline, and amplitude.</p> | <p>Math 1 M5 Lesson 8: Graphing Exponential Functions</p> <p>Math 1 M5 Lesson 9: Using Transformations to Graph Exponential Functions (Bases Greater Than 1)</p> <p>Math 1 M5 Lesson 10: Using Transformations to Graph Exponential Functions (Bases Between 0 and 1)</p> <p><i>Supplemental material is necessary to address logarithmic and trigonometric functions for this standard.</i></p> |
| <p>F-IF.9</p> <p>Compare properties of two functions each represented in a different way (algebraically, graphically, numerically in tables, or by verbal descriptions).</p> | <p>Math 1 M3 Lesson 11: Comparing Functions</p> |

Building Functions

Build a function that models a relationship between two quantities.

| Montana Content Standards for Mathematics | Aligned Components of <i>Eureka Math</i> ² |
|---|--|
| <p>F-BF.1</p> <p>Write a function that describes a relationship between two quantities.</p> | <p>Math 1 M6 Lesson 3: Analyzing Paint Splatters</p> <p>Math 1 M6 Lesson 9: Solar System Models</p> |
| <p>F-BF.1.a</p> <p>Determine an explicit expression, a recursive process, or steps for calculation from a context.</p> | <p>Math 1 M1 Lesson 2: Looking for Patterns</p> <p>Math 1 M5 Topic A: Arithmetic and Geometric Sequences</p> <p>Math 1 M5 Lesson 7: Exponential Functions</p> <p>Math 1 M5 Lesson 13: Calculating Interest</p> <p>Math 1 M6 Lesson 3: Analyzing Paint Splatters</p> <p>Math 1 M6 Lesson 8: The Deal</p> <p>Math 1 M6 Lesson 9: Solar System Models</p> |
| <p>F-BF.1.b</p> <p>Combine standard function types using arithmetic operations.</p> | <p>Math 1 M6 Lesson 8: The Deal</p> |
| <p>F-BF.2</p> <p>Write arithmetic and geometric sequences both recursively and with an explicit formula, use them to model situations from a variety of contexts (e.g., science, history, and culture, including those of the Montana American Indian), and translate between the two forms.</p> | <p>Math 1 M5 Lesson 5: Arithmetic and Geometric Sequences</p> <p>Math 1 M5 Lesson 6: Representations of Arithmetic and Geometric Sequences</p> <p>Math 1 M6 Lesson 8: The Deal</p> <p><i>Supplemental material is necessary to address a variety of contexts, including those of Montana American Indians.</i></p> |

Building Functions

Build new functions from existing functions.

| Montana Content Standards for Mathematics | Aligned Components of <i>Eureka Math</i> ² |
|--|--|
| <p>F-BF.3</p> <p>Identify the effect on the graph of replacing $f(x)$ by $f(x) + k$, $kf(x)$, $f(kx)$, and $f(x + k)$ for specific values of k (both positive and negative); find the value of k given the graphs. Experiment with cases and illustrate an explanation of the effects on the graph using technology.</p> | <p>Math 1 M3 Topic D: Transformations of Functions</p> <p>Math 1 M5 Lesson 9: Using Transformations to Graph Exponential Functions (Bases Greater Than 1)</p> <p>Math 1 M5 Lesson 10: Using Transformations to Graph Exponential Functions (Bases Between 0 and 1)</p> <p>Math 1 M5 Lesson 12: Writing Equations for Exponential Functions from Tables or Graphs</p> |

Linear, Quadratic, and Exponential Models

Construct and compare linear, quadratic, and exponential models and solve problems.

| Montana Content Standards for Mathematics | Aligned Components of <i>Eureka Math</i> ² |
|--|---|
| <p>F-LE.1</p> <p>Distinguish between situations that can be modeled with linear functions and with exponential functions.</p> | <p>Math 1 M5 Lesson 13: Calculating Interest</p> <p>Math 1 M5 Lesson 16: Modeling Populations</p> <p>Math 1 M5 Lesson 20: World Population Prediction</p> <p>Math 1 M5 Lesson 21: A Closer Look at Populations</p> <p>Math 1 M5 Lesson 23: Modeling an Invasive Species Population</p> <p>Math 1 M6 Lesson 2: Using Residual Plots to Select Models for Data</p> <p>Math 1 M6 Lesson 3: Analyzing Paint Splatters</p> <p>Math 1 M6 Lesson 11: A Vanishing Sea</p> |
