
Mathematics I | Mathematics Standards of Learning for Virginia Public Schools Correlation to *Eureka Math*²®

When the original *Eureka Math*[®] curriculum was released, it quickly became the most widely used K–5 mathematics curriculum in the country. Now, the Great Minds[®] teacher–writers have created *Eureka Math*²®, a groundbreaking new curriculum that helps teachers deliver *exponentially better* math instruction while still providing students with the same deep understanding of and fluency in math. *Eureka Math*² carefully sequences mathematical content to maximize vertical alignment—a principle tested and proven to be essential in students’ mastery of math—from kindergarten through high school.

While this innovative new curriculum includes all the trademark *Eureka Math* aha moments that have been delighting students and teachers for years, it also boasts these exciting new features:

Teachability

*Eureka Math*² employs streamlined materials that allow teachers to plan more efficiently and focus their energy on delivering high-quality instruction that meets the individual needs of their students. Differentiation suggestions, slide decks, digital interactives, and multiple forms of assessment are just a few of the resources built right into the teacher materials.

Accessibility

*Eureka Math*² incorporates Universal Design for Learning principles so all learners can access the mathematics and take on challenging math concepts. Student supports are built into the instructional design and are clearly identified in the *Teach* book. Further, the curriculum carries a focus on readability. By eliminating unnecessary words and using simple, clear sentences, the *Eureka Math*² teacher–writers have created one of the most readable mathematics curricula on the market. The curriculum’s readability and accessibility help all students see themselves as mathematical thinkers and doers who are fully capable of owning their mathematics learning.

Digital Engagement

The digital elements of *Eureka Math*² add to students’ engagement with the math. The curriculum provides teachers with digital slides for each lesson. In addition, each grade level includes wordless videos that spark students’ interest and curiosity. Students at all levels work through mathematical explorations that help lead to their own mathematical discoveries. Digital lessons and videos provide opportunities for students to wonder, explore, and make sense of mathematics, which contributes to the development of a strong, positive mathematical identity.

| Mathematical Process Goals for Students | Aligned Components of <i>Eureka Math</i>² |
|------------------------------------------------|------------------------------------------------------------------------------------------------------------------------------------|
| Mathematical Problem Solving | Lessons in every module engage students in mathematical processes. These are indicated in margin notes included with every lesson. |
| Mathematical Communication | Lessons in every module engage students in mathematical processes. These are indicated in margin notes included with every lesson. |
| Mathematical Reasoning | Lessons in every module engage students in mathematical processes. These are indicated in margin notes included with every lesson. |
| Mathematical Connections | Lessons in every module engage students in mathematical processes. These are indicated in margin notes included with every lesson. |
| Mathematical Representations | Lessons in every module engage students in mathematical processes. These are indicated in margin notes included with every lesson. |

Probability and Statistics

8.PS.3 The student will apply the data cycle (formulate questions; collect or acquire data; organize and represent data; and analyze data and communicate results) with a focus on scatterplots.

| <p>PS.DS.6.d</p> <p>Use regression lines to make predictions, and identify the limitations of the predictions, such as extrapolation.</p> | <p>Math 1 M2 Lesson 23: Using Lines to Model Bivariate Quantitative Data</p> <p>Math 1 M2 Lesson 24: Modeling Relationships with a Line</p> <p>Math 1 M2 Lesson 25: Calculating and Analyzing Residuals</p> <p>Math 1 M2 Lesson 27: Interpreting Correlation</p> <p>Math 1 M6 Lesson 2: Using Residual Plots to Select Models for Data</p> <p>Math 1 M6 Lesson 3: Analyzing Paint Splatters</p> <p>Math 1 M6 Lesson 11: A Vanishing Sea</p> |
| <p>PS.DS.6.e</p> <p>Calculate and interpret a residual to understand the error of a prediction.</p> | <p>Math 1 M2 Lesson 25: Calculating and Analyzing Residuals</p> <p>Math 1 M2 Lesson 26: Analyzing Residuals</p> <p>Math 1 M6 Lesson 2: Using Residual Plots to Select Models for Data</p> <p>Math 1 M6 Lesson 3: Analyzing Paint Splatters</p> |

Functional Relationships

MA.FR.3 The student will analyze sequences and finite series, and model and solve problems in context using sequences and series.

Mathematics Standards of Learning for Virginia Public Schools

Aligned Components of *Eureka Math*²
