

# GEODES® Level 3

Level 3 Geodes® includes 16 unique books organized into four modules by topic of study. Each chapter book accomplishes two goals: it boosts student knowledge about an engaging topic in science, history, or the arts and it enables students to apply and practice foundational reading skills.

The books are accessible to grade 3 students at varying levels of reading proficiency. The books grow in phonetic complexity from Book 1 to Book 4. Likewise, they build in word count and word type, from mostly one-syllable words in Book 1, to two-syllable words in Books 2 and 3, and more multisyllabic words in Book 4. Each book is also rich in content vocabulary and provides opportunities for morphological instruction.
