

The *PhD Science*® Core Text Library contains 32 titles at Levels K–5. You can get your students more engaged in learning about science through authentic trade books, many of which are award winning.

These high-interest, nonfiction informational texts can be used

- as core texts aligned to *PhD Science*,
- with any science program,
- to incorporate science into your literacy block, or
- in your classroom library for independent reading.

When these texts are used with *PhD Science*, students build knowledge coherently and make meaningful connections across content areas. Please note that to teach *PhD Science*, the full core text library is recommended. You can order classroom text bundles by grade level by using the ISBNs listed on the right. We've included the recommended text quantity for each grade level on the subsequent pages.

Additionally, you can mix and match the books for student interest or science topics to be covered during science instruction. With these selections, you can easily integrate science in your reading block or simply add more science-related books to your classroom library.

All the titles are available in English, and the majority are also available in Spanish, with many of the **Spanish titles exclusively available through Great Minds**®. With the science trade books available through Great Minds, Spanish-speaking students can still access the same high-quality texts for parity to the texts of their English-speaking peers on the relevant science topics.
