

Dear Parent or Guardian,

We're introducing a new science curriculum called *PhD Science*®.

What is *PhD Science*?

PhD Science is an exemplary science program from Great Minds®, the creators of *Eureka Math*^{2™} and *Wit & Wisdom*®. Created by a team of teacher-writers and subject-matter experts, this innovative curriculum inspires students to wonder about the world and empowers them to make sense of it.

Family Resources

Your involvement in your child's education can have a significant impact on his or her success in school. That's why the teacher-writers who developed the curriculum also created a suite of family support resources that will help you support your child in developing their science knowledge.

- **Family Tip Sheets** provide parents with an overview of each module in *PhD Science* and guidance on how to best support their student at home.
- **At Home Activities** allow you to continue the excitement of what your student is learning with *PhD Science* with select extension and optional homework activities highlighted.
- The **Aha! blog** contains posts that explain how *PhD Science* was developed and may prepare you in supporting your student for the science learning that will take place in the classroom.
